Landform Model Supplies

Tin foil sheet
5 Clay Pieces
Plastic container
Craft stick

Step 1: Write name on outside of the lid

Step 2: Scrunch large tin foil to form mountain and glacier

Mountain and Glacier

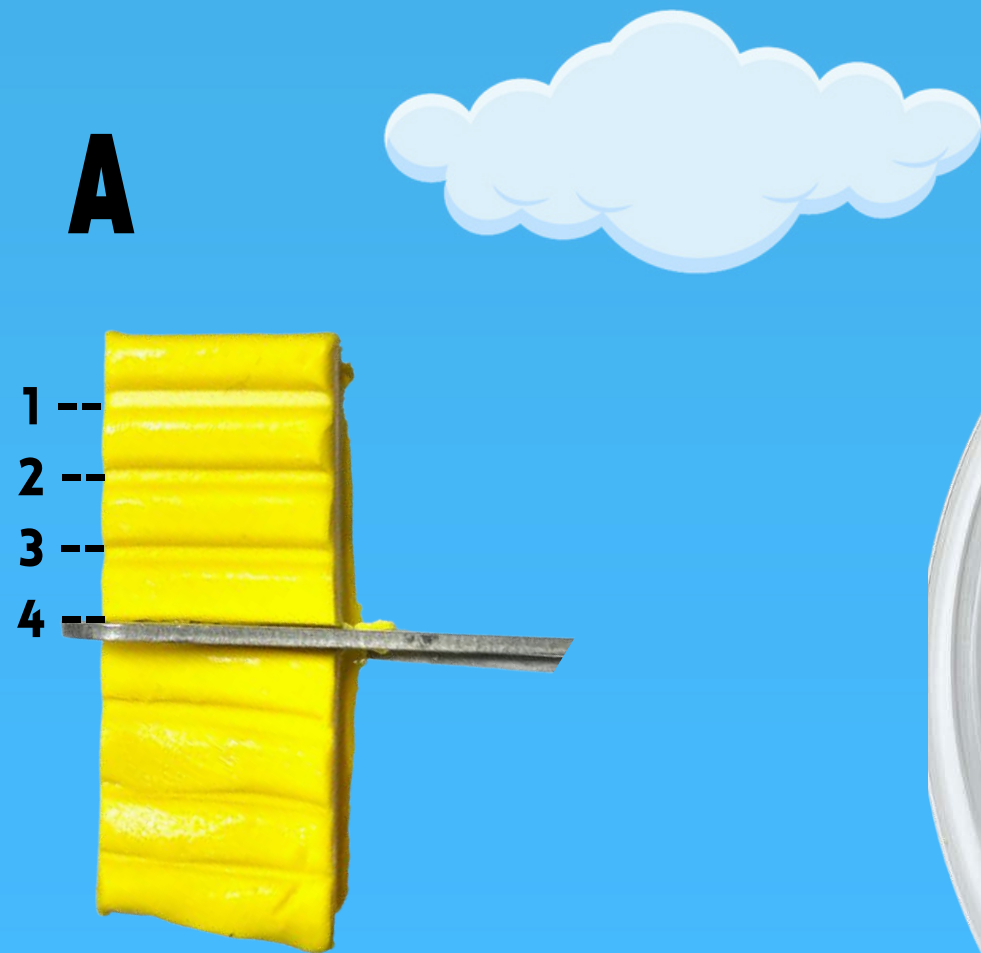

Step 3: Scrunch strip of tin foil to form a plateau

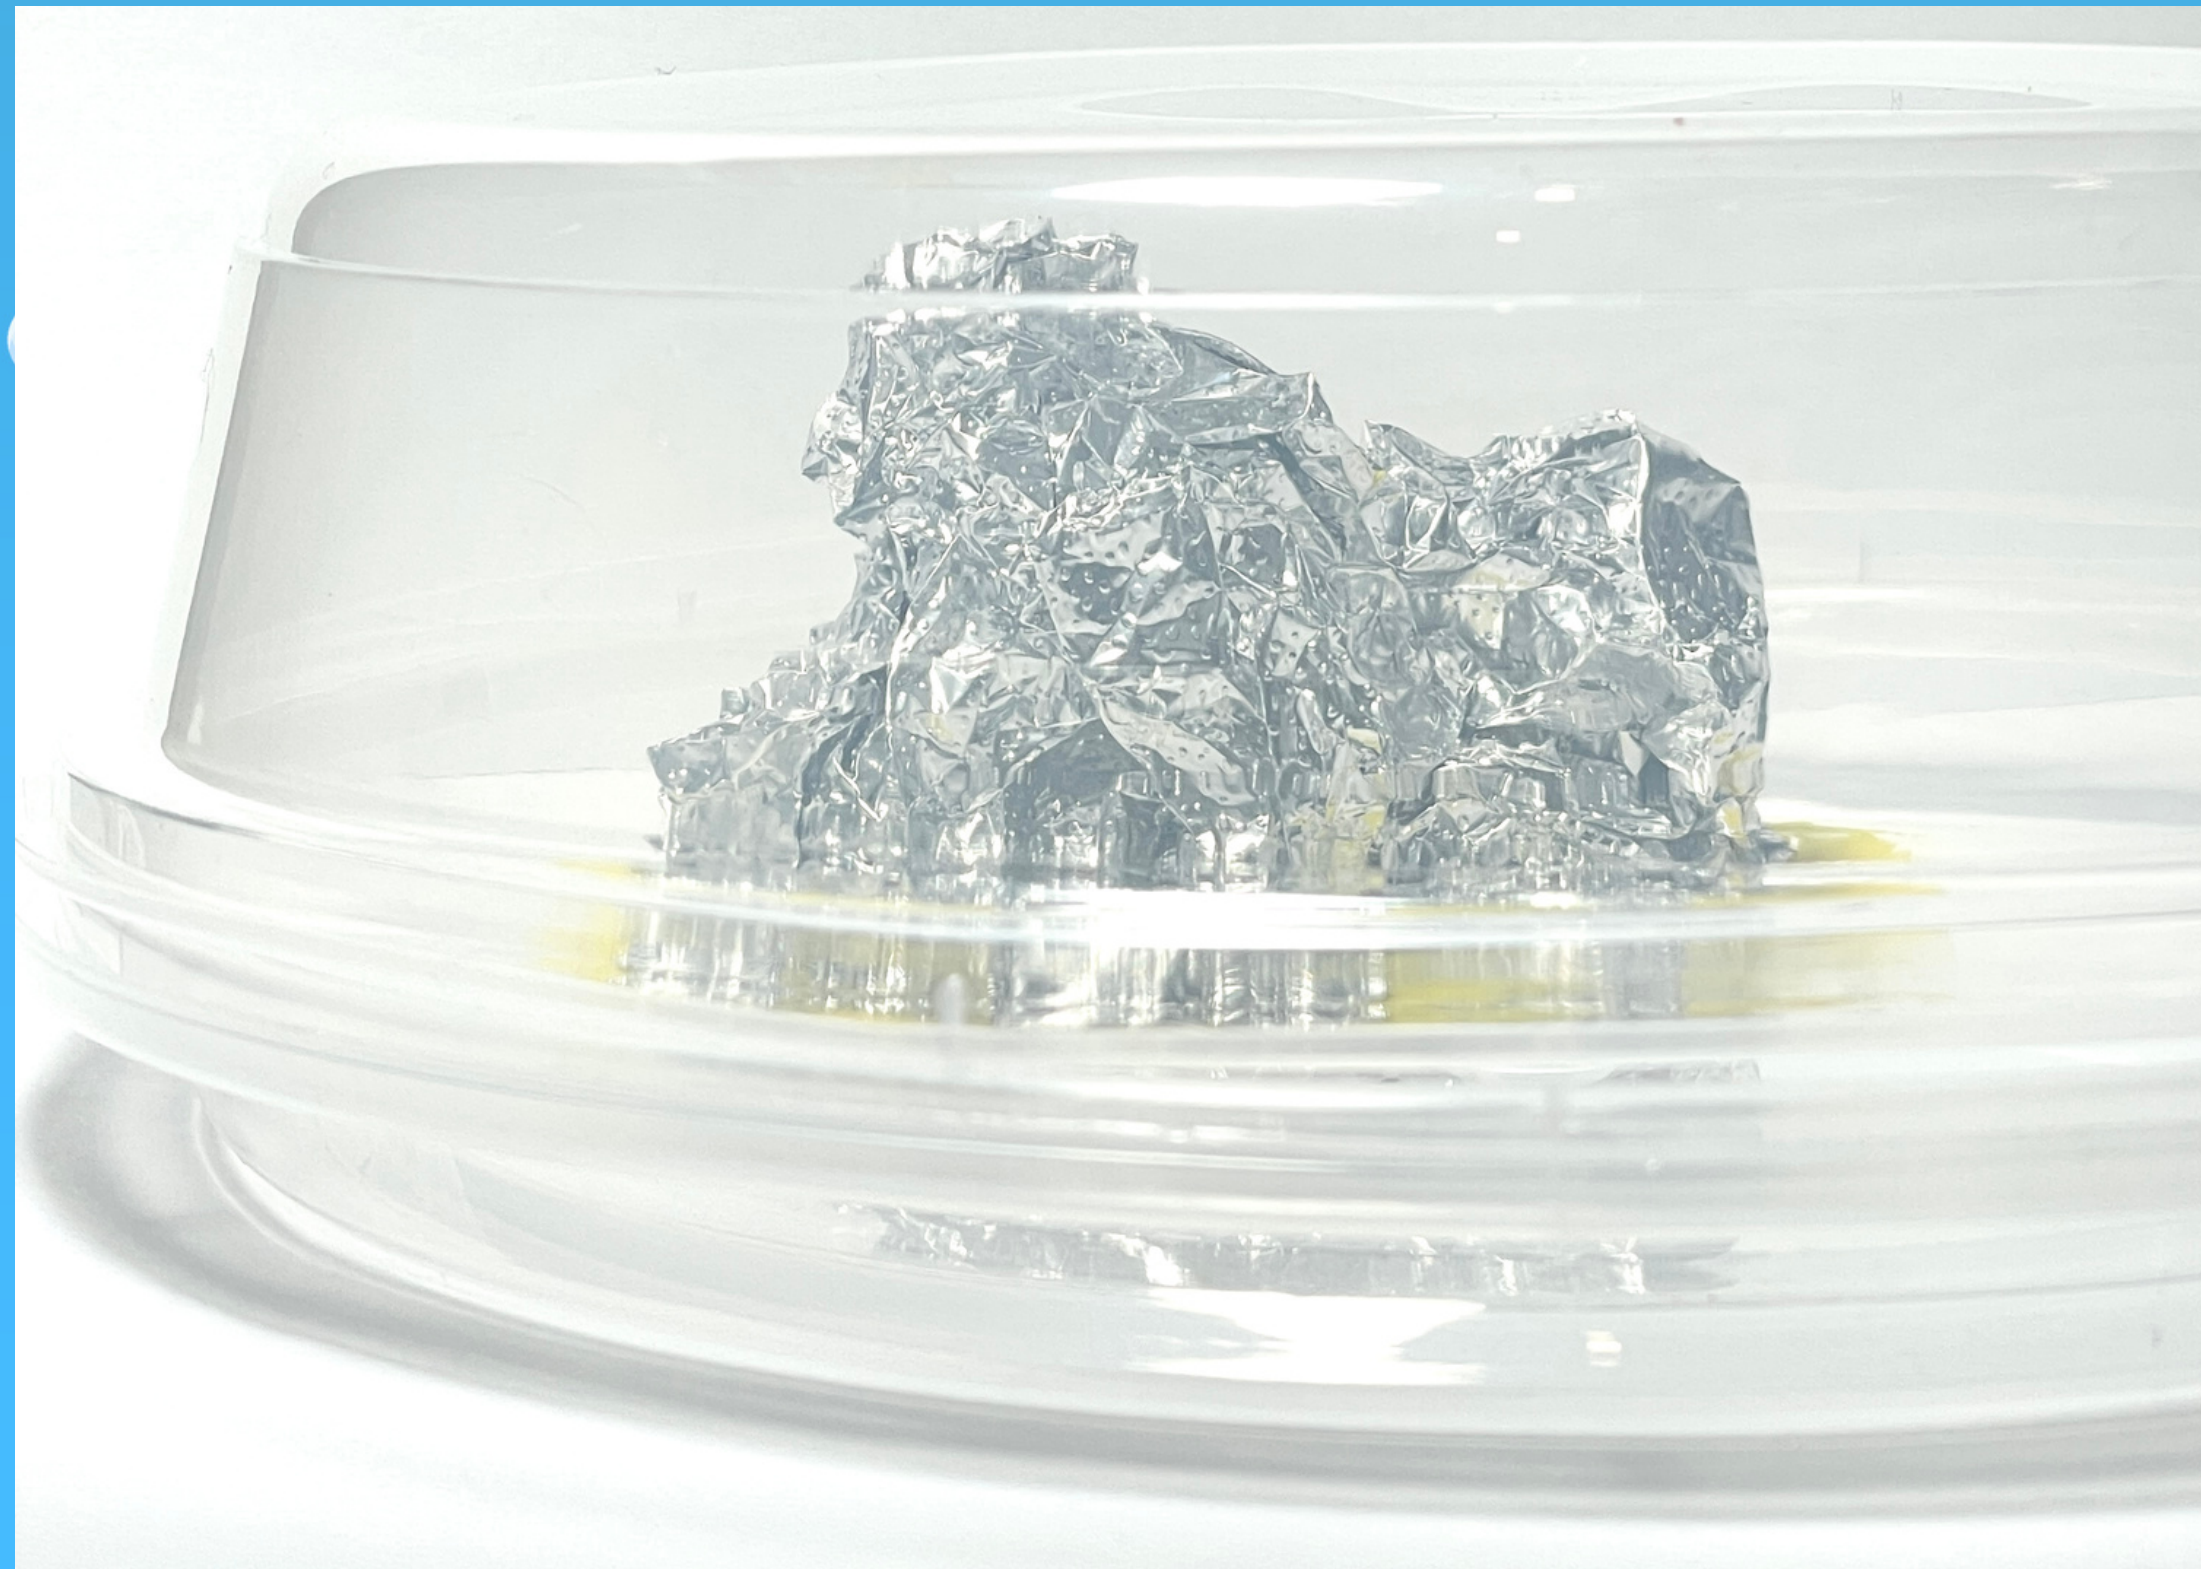

Plateau

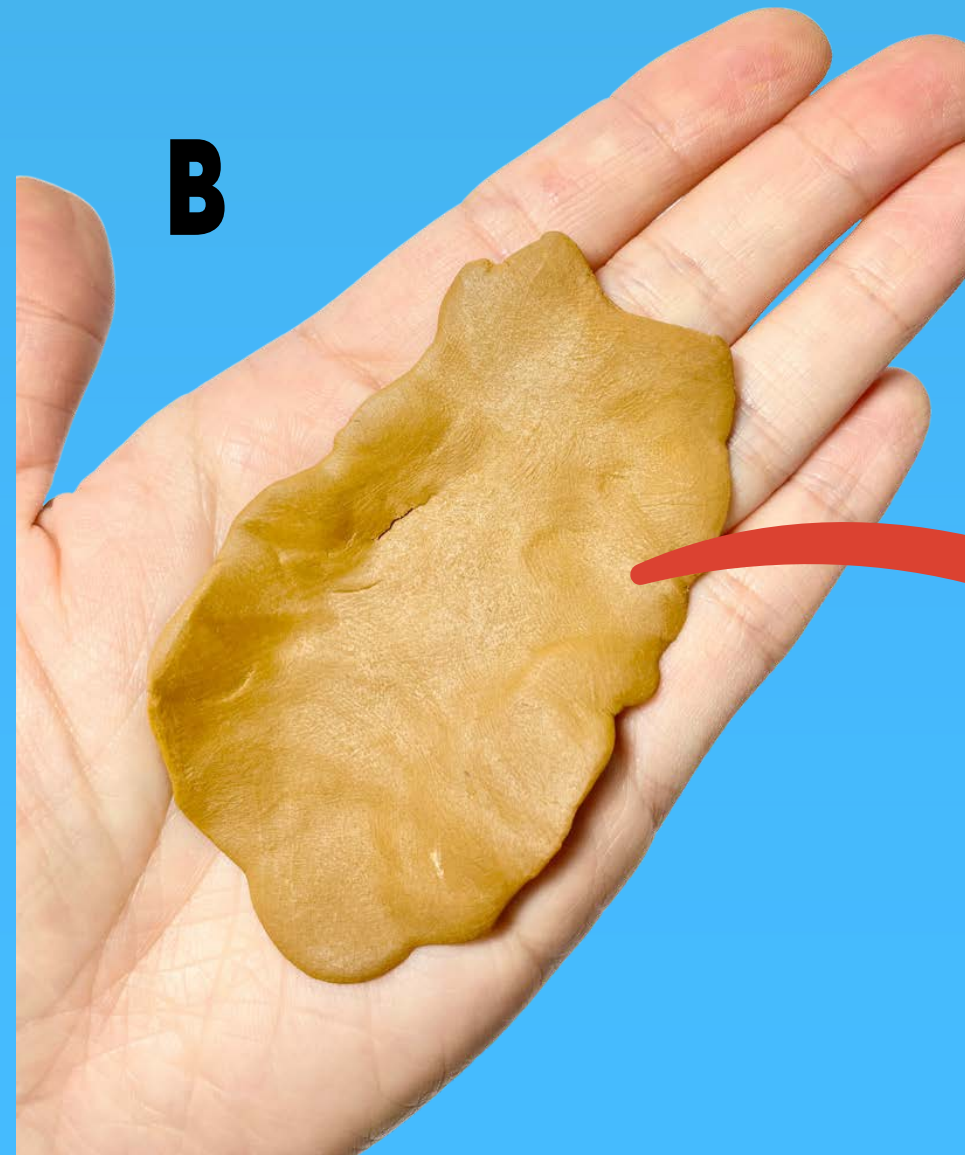

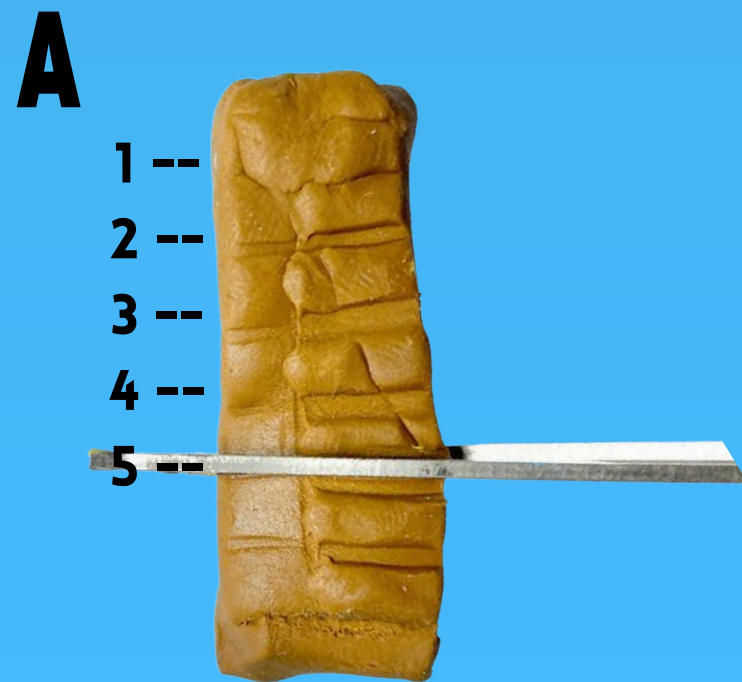

Step 4: Cut yellow clay 4 lines down and create base for mountain and glacier.

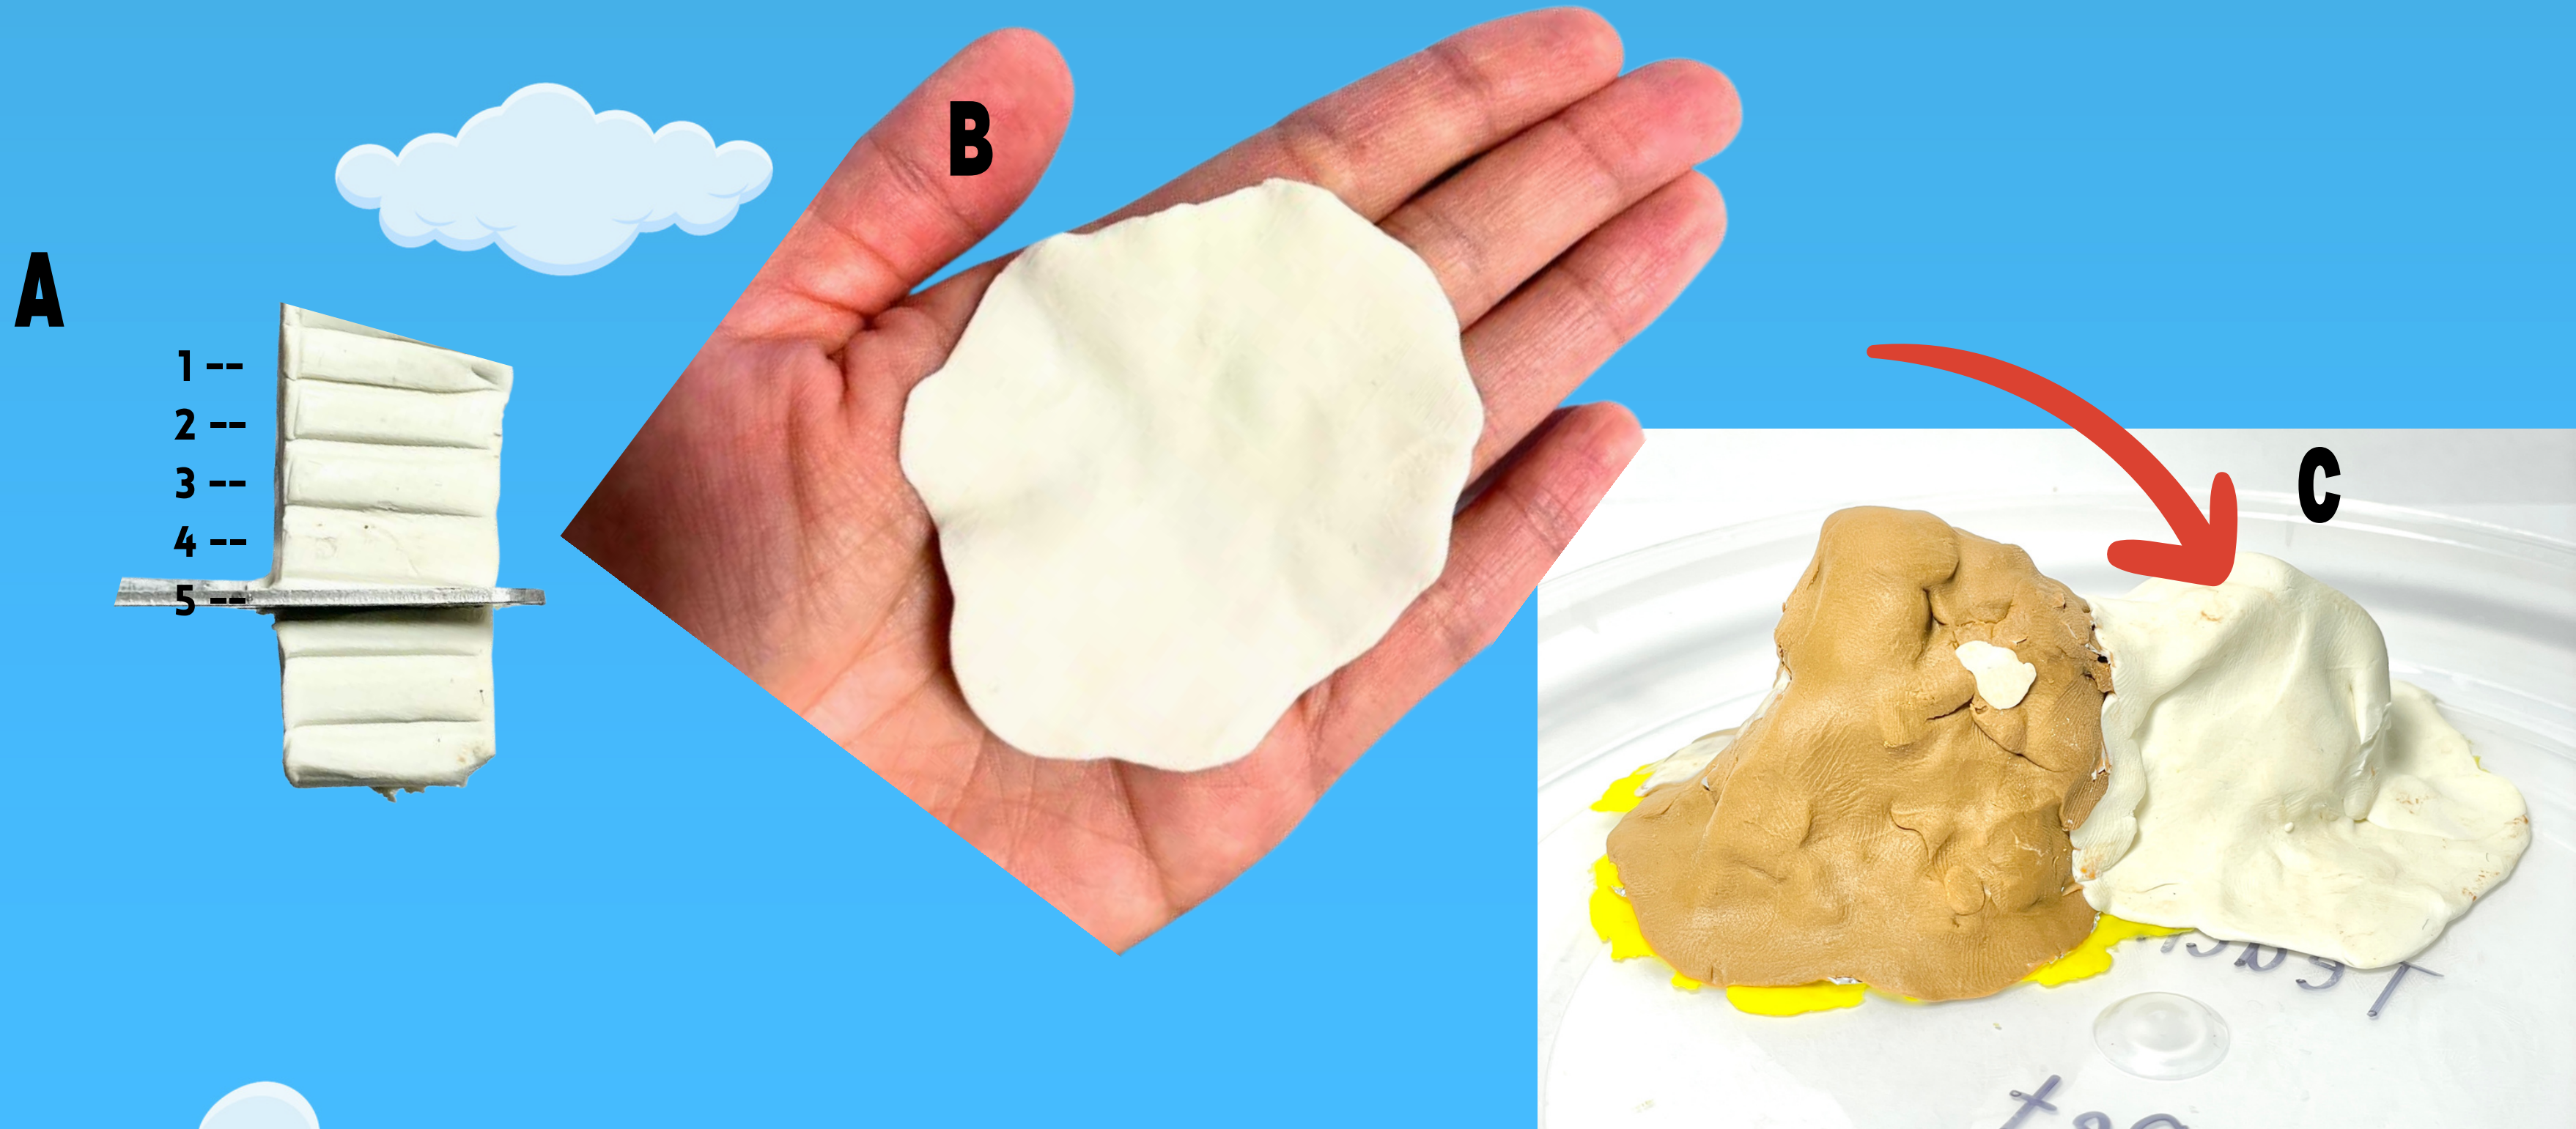

Check that the dome can close

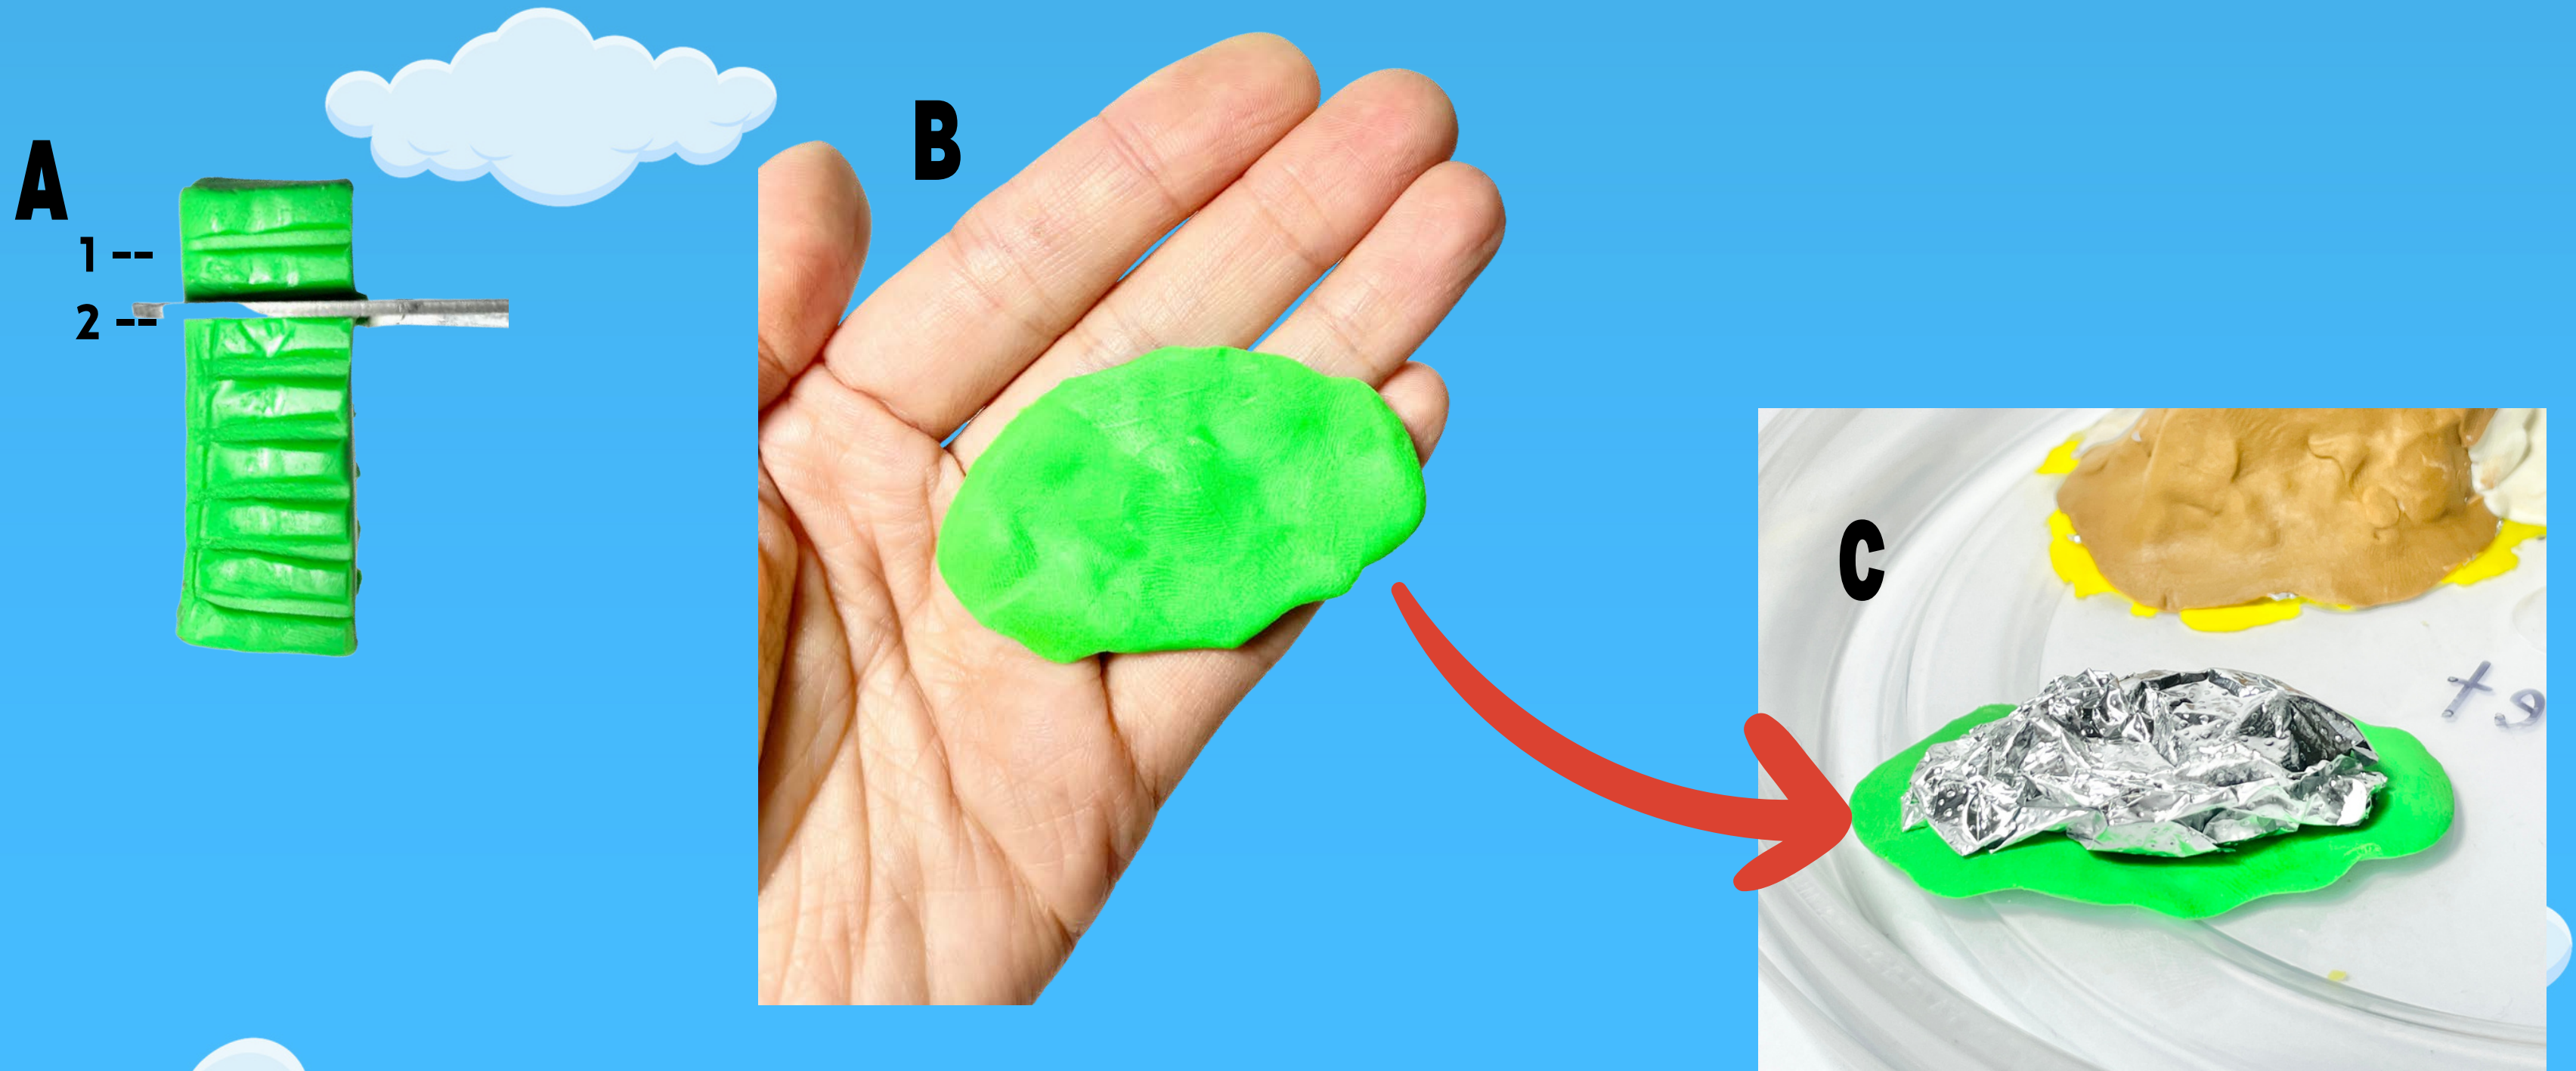

**Step 5: Cut brown clay 5 lines down. Set smaller piece aside.
Create a pancake to lay over the mountain.**

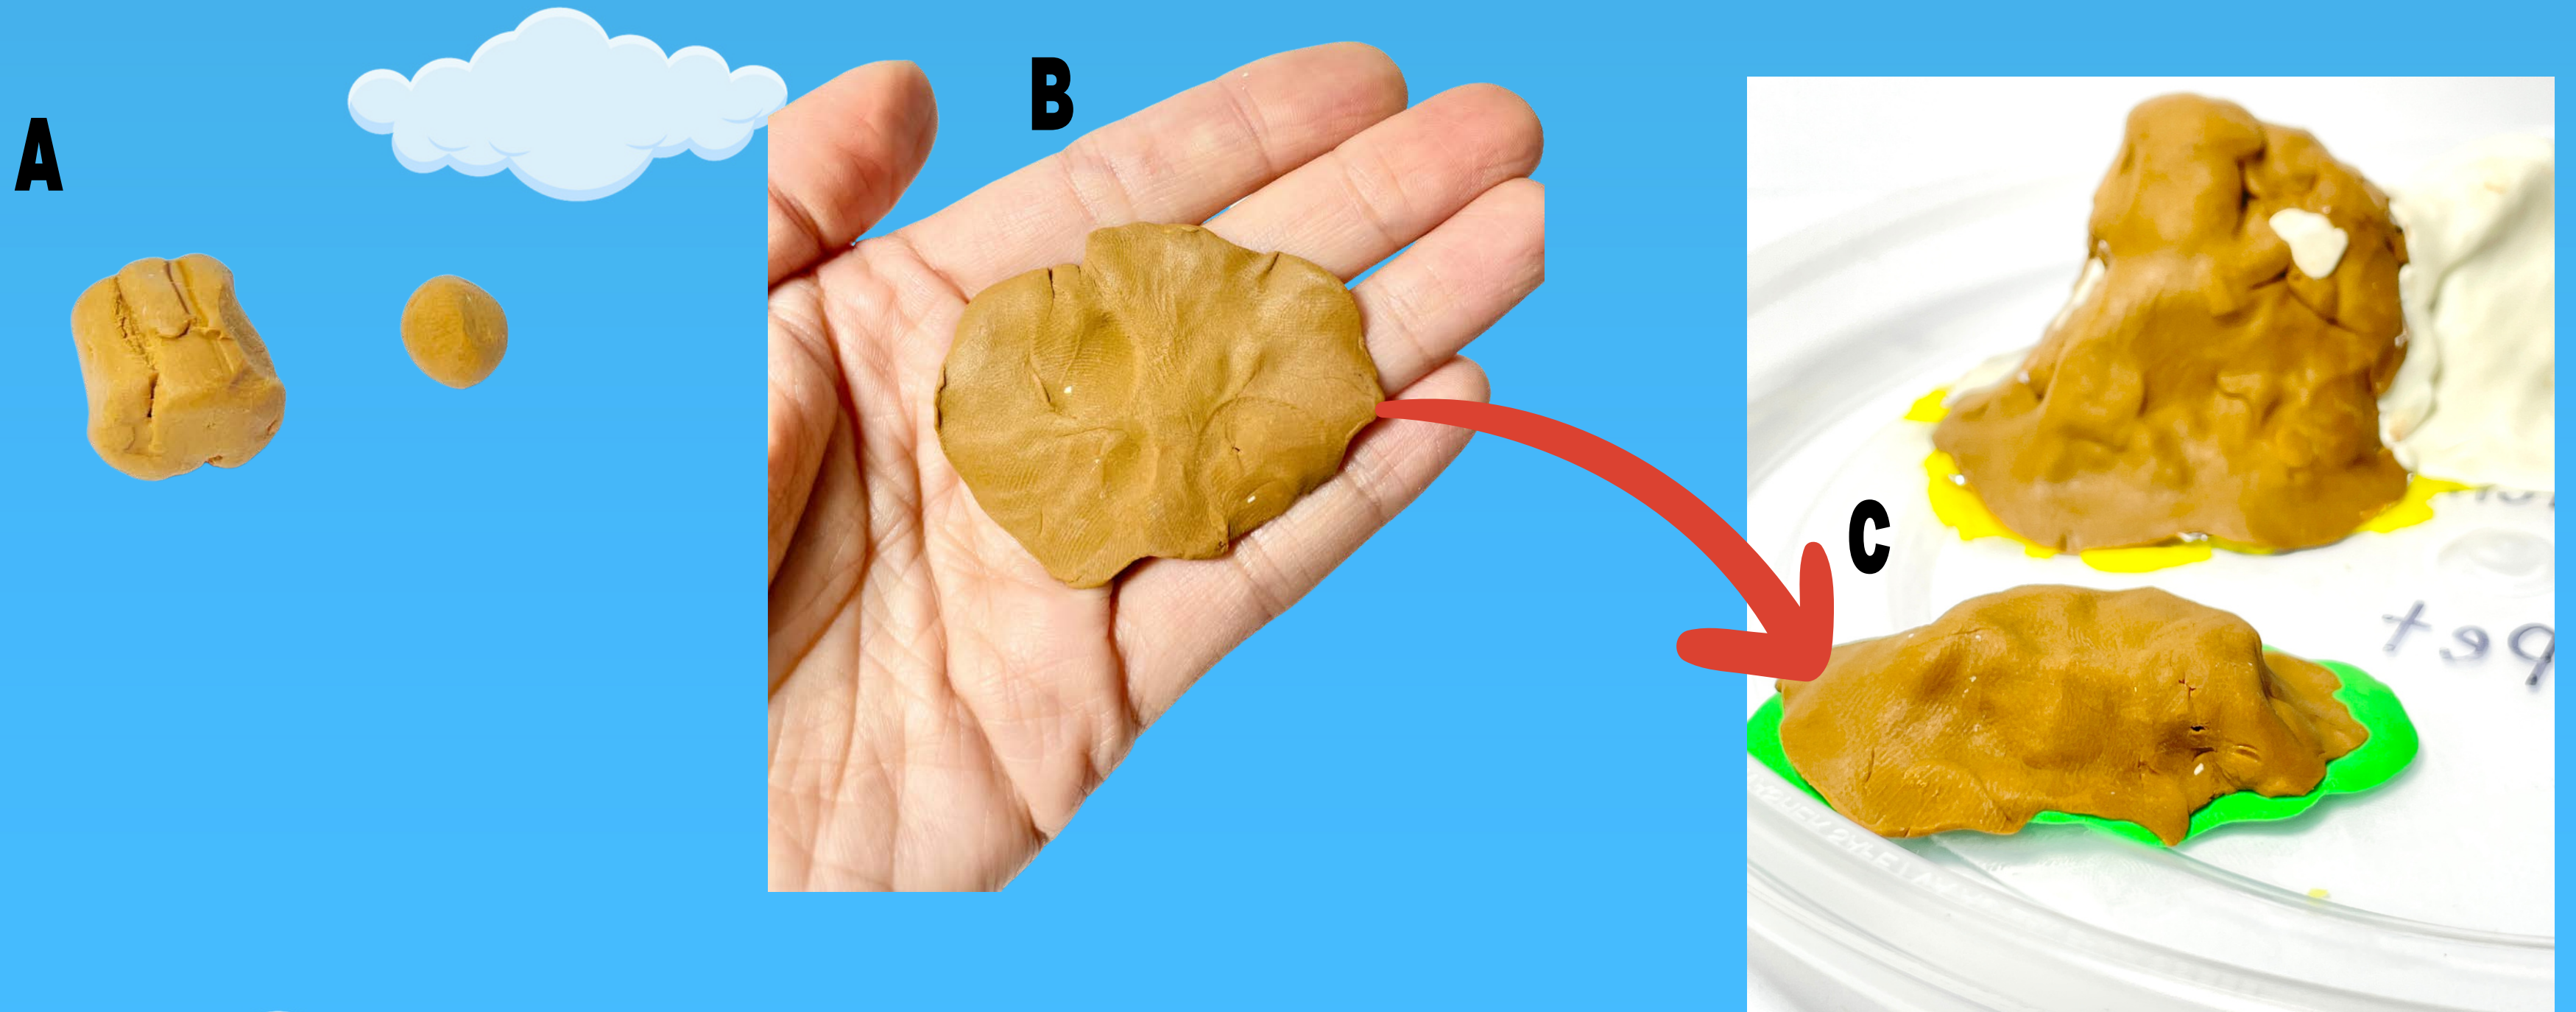

**Step 6: Cut white clay 5 lines down. Set smaller piece aside.
Create a pancake to lay over the glacier.**

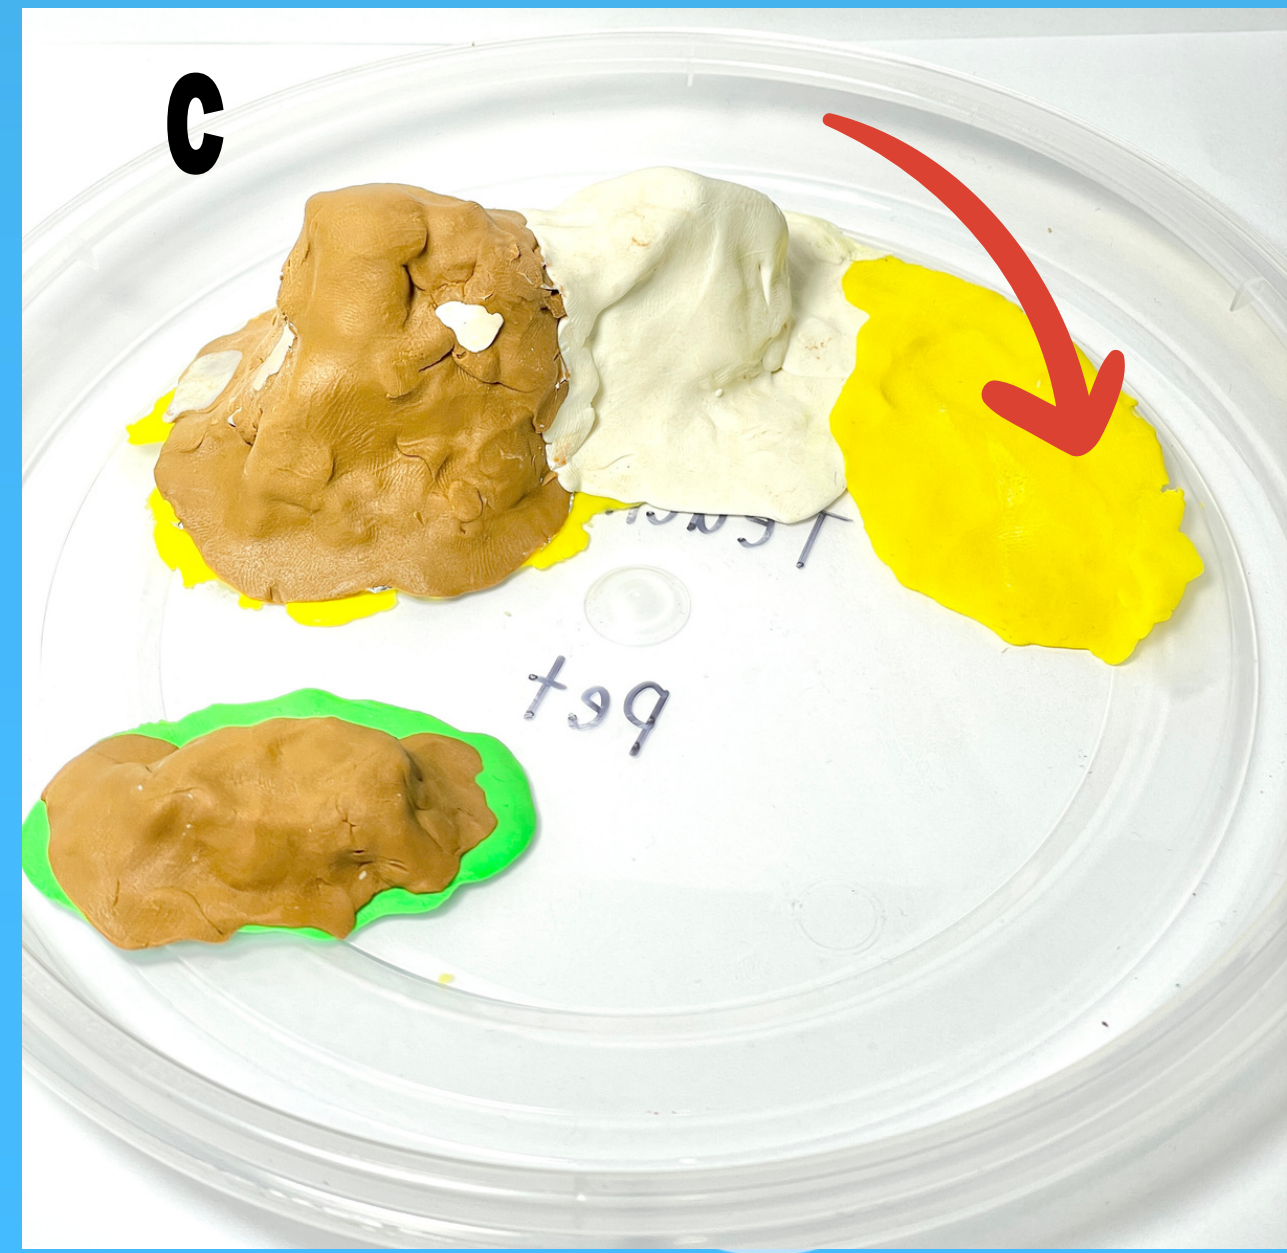

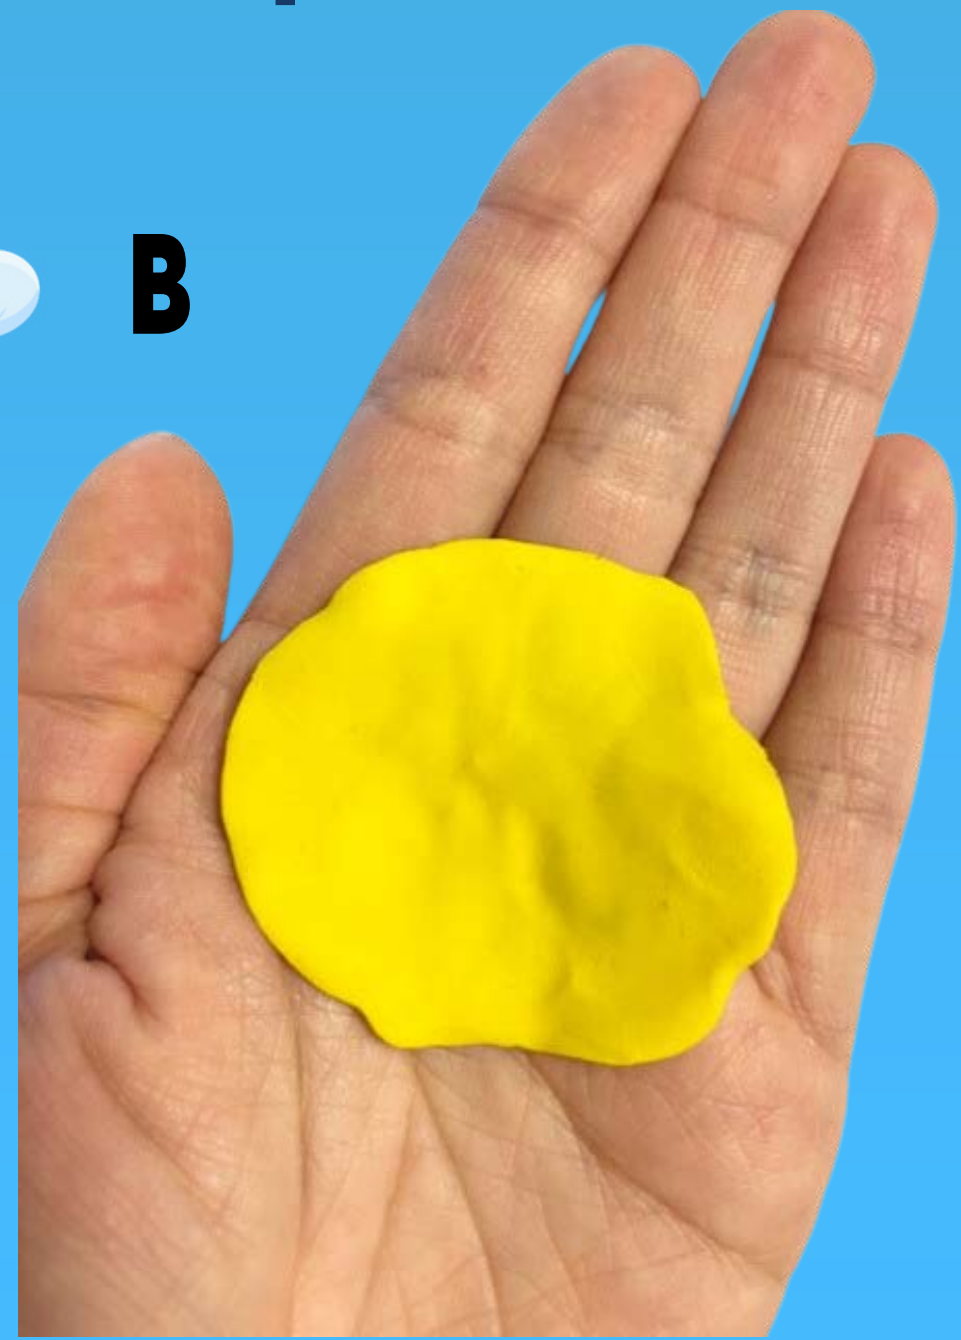

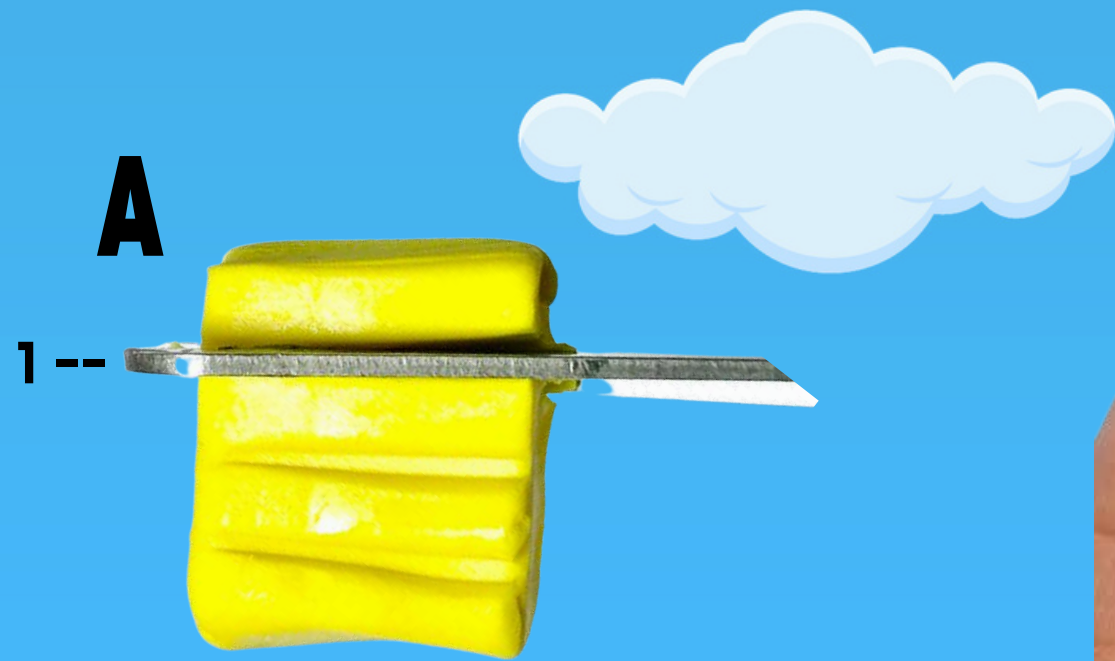

Step 7: Cut green clay 2 lines down. Using the smaller piece, make a pancake for the base of the plateau.

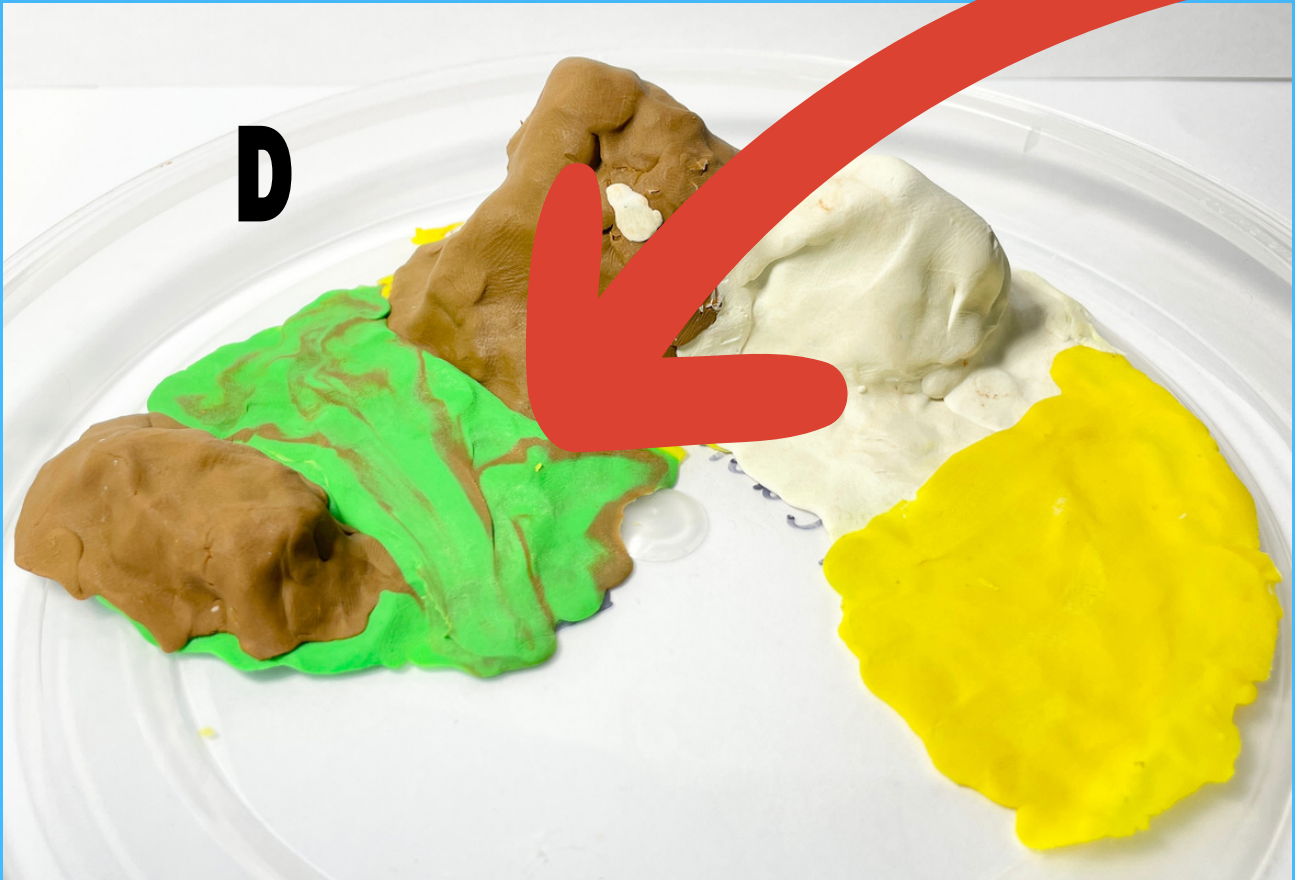

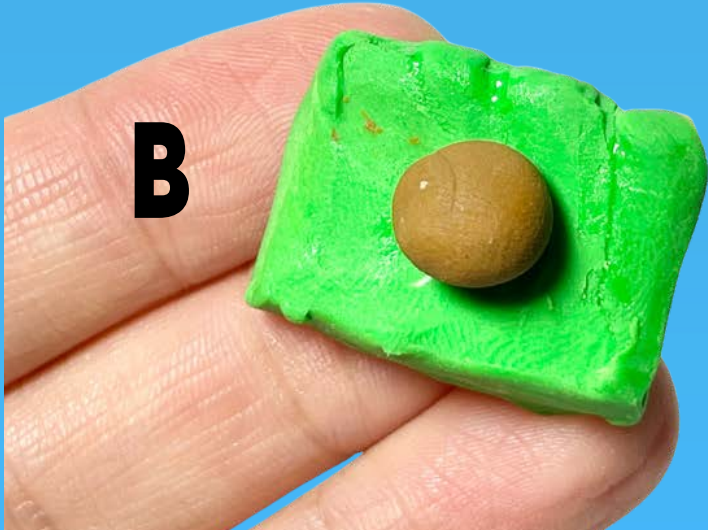

**Step 8: Rip pea-size amount of brown clay and set it aside.
Using the larger piece make a pancake to cover your plateau.**

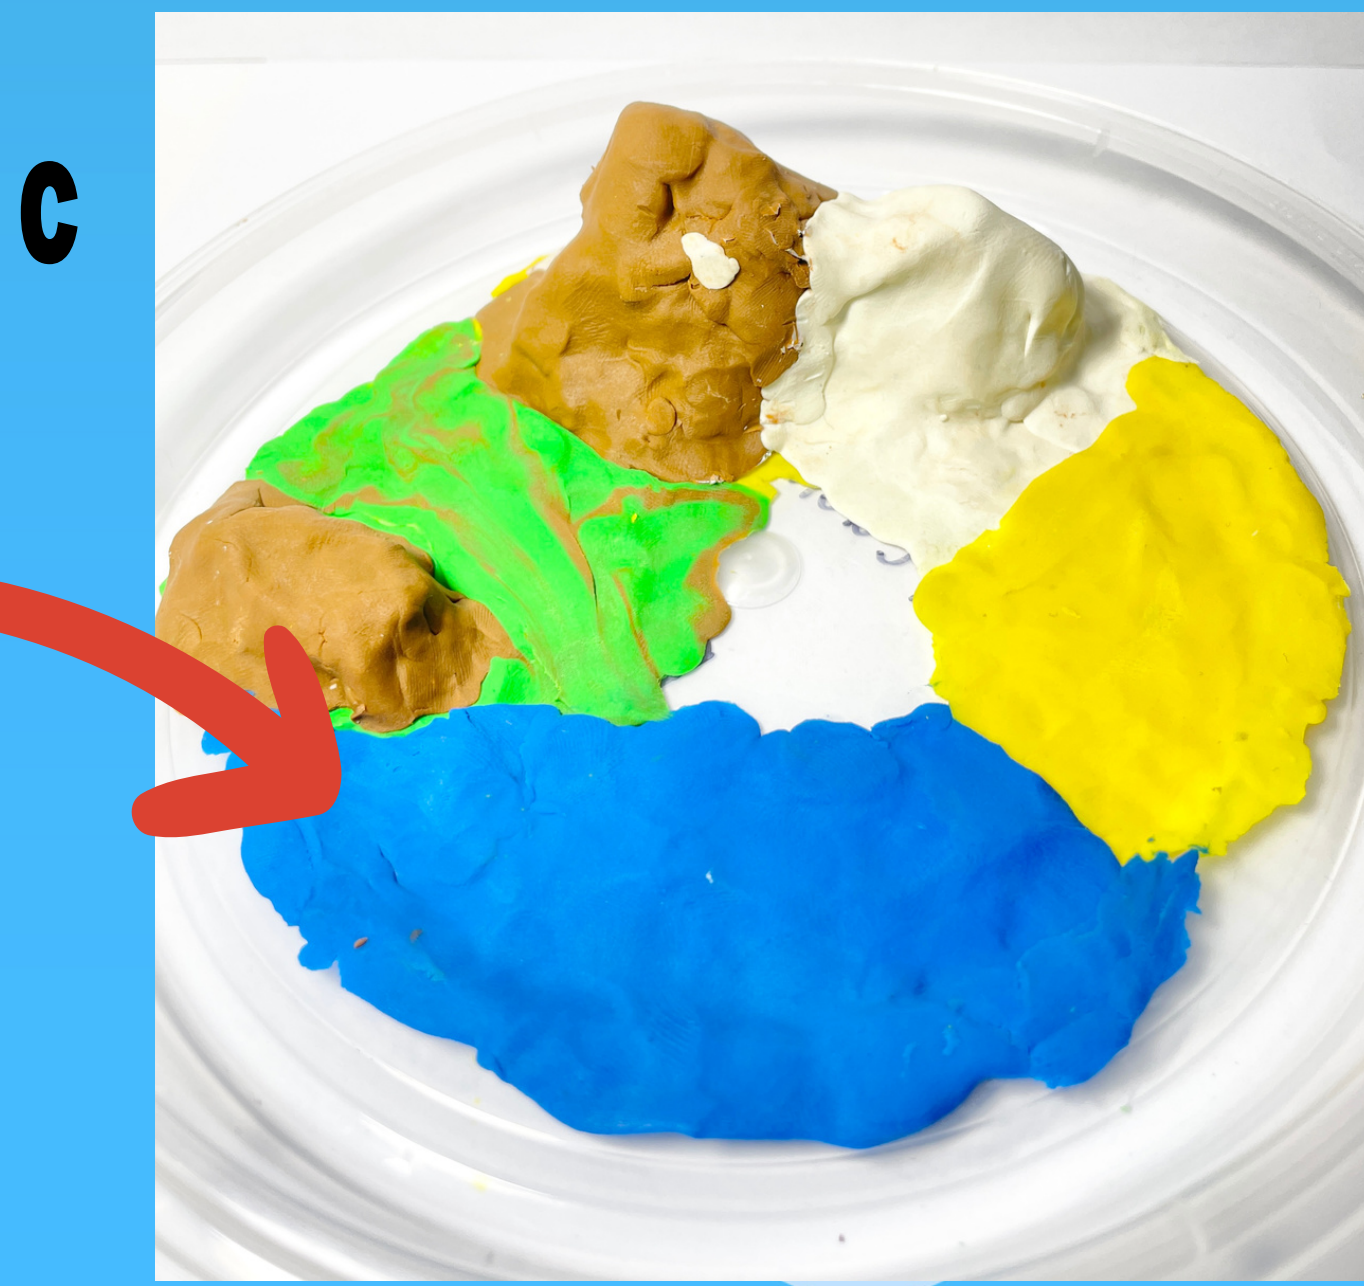

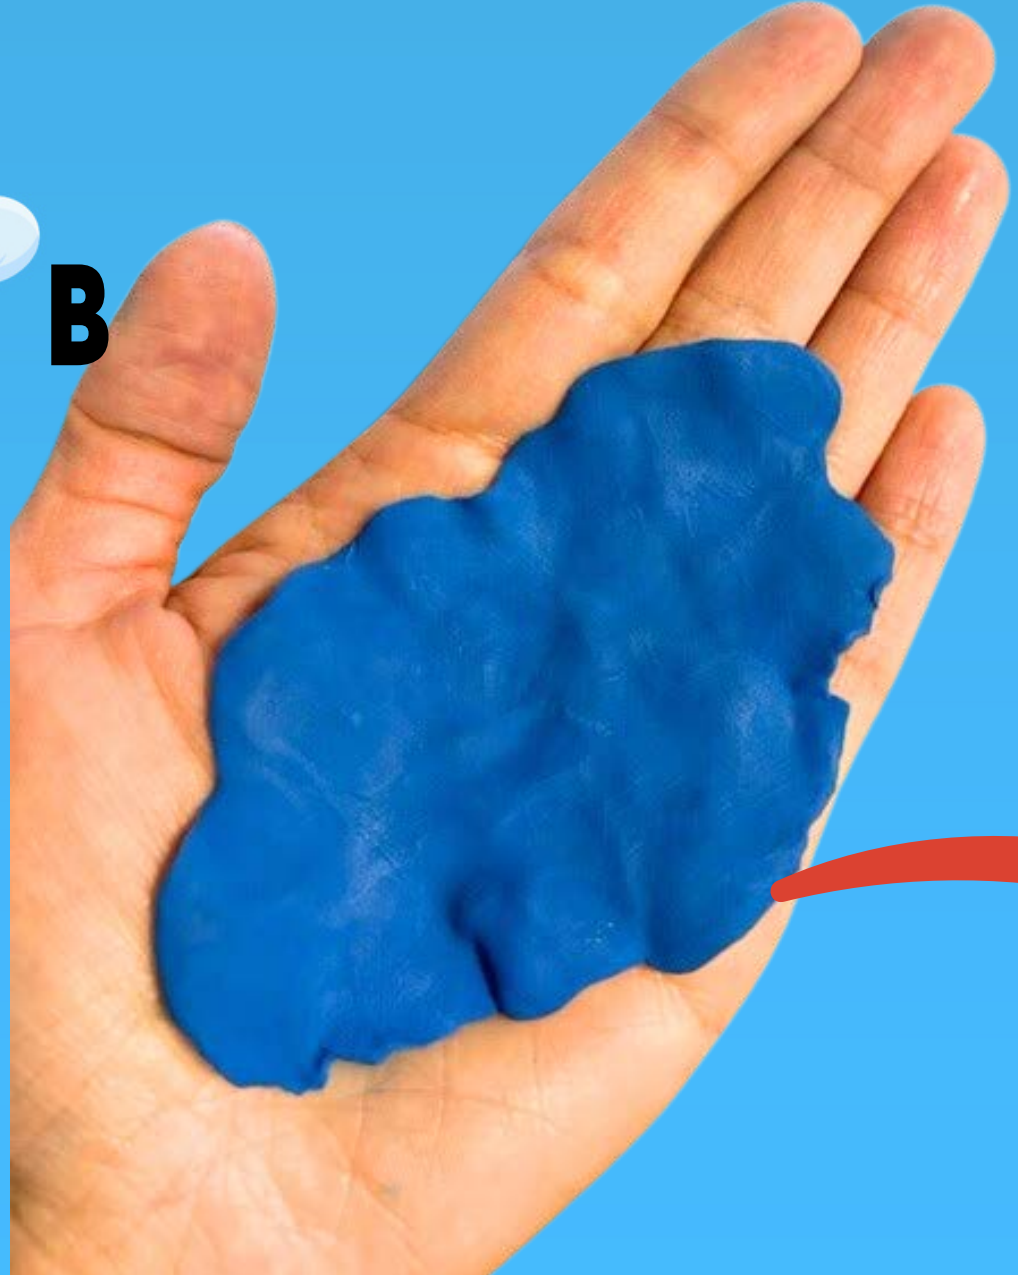

**Step 9: Cut yellow clay 1 line down. Set smaller piece aside.
Create a pancake for the prairie.**

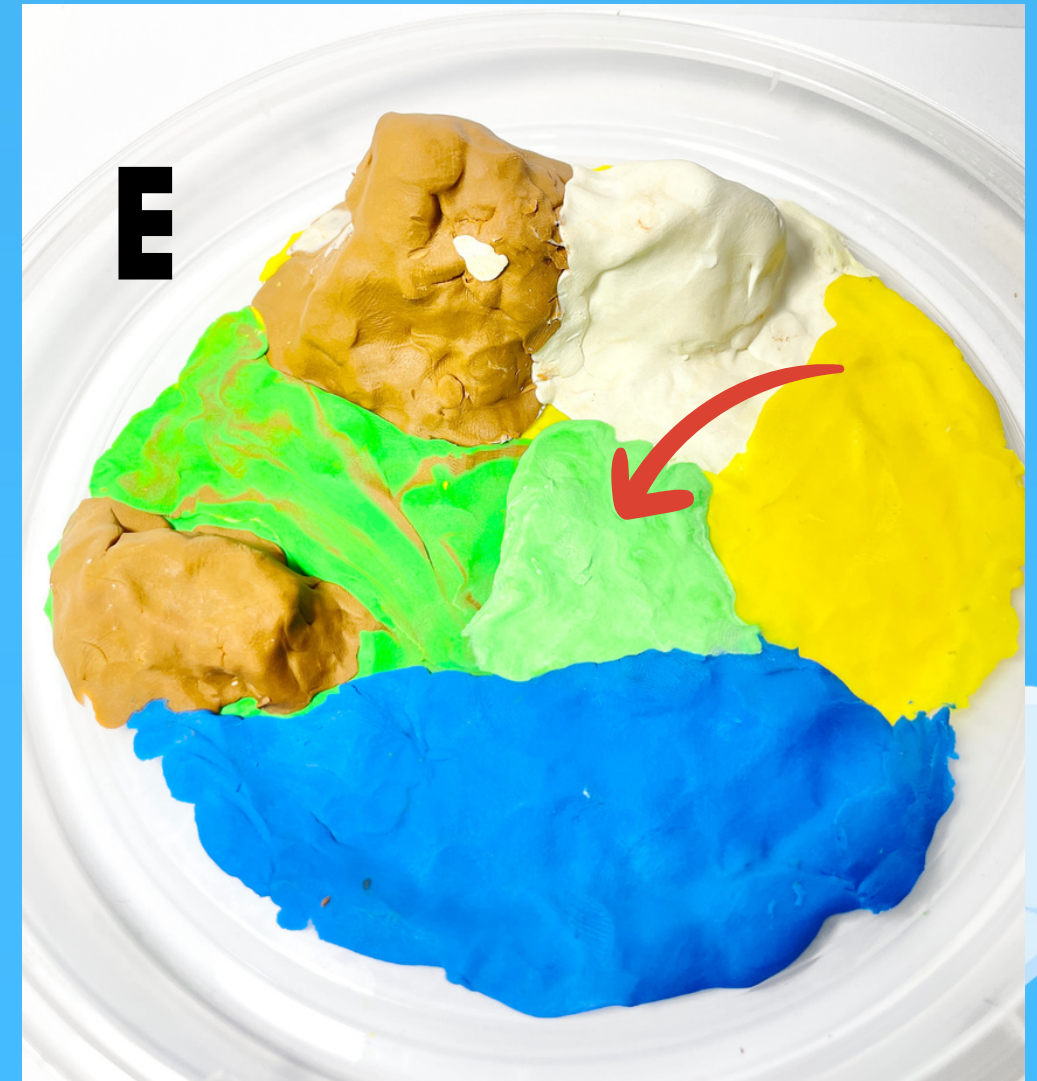

Step 10: Cut green clay 2 lines down. Set smaller piece aside. Slightly mix green and pea-size brown clay. Form a pancake for the wetlands.

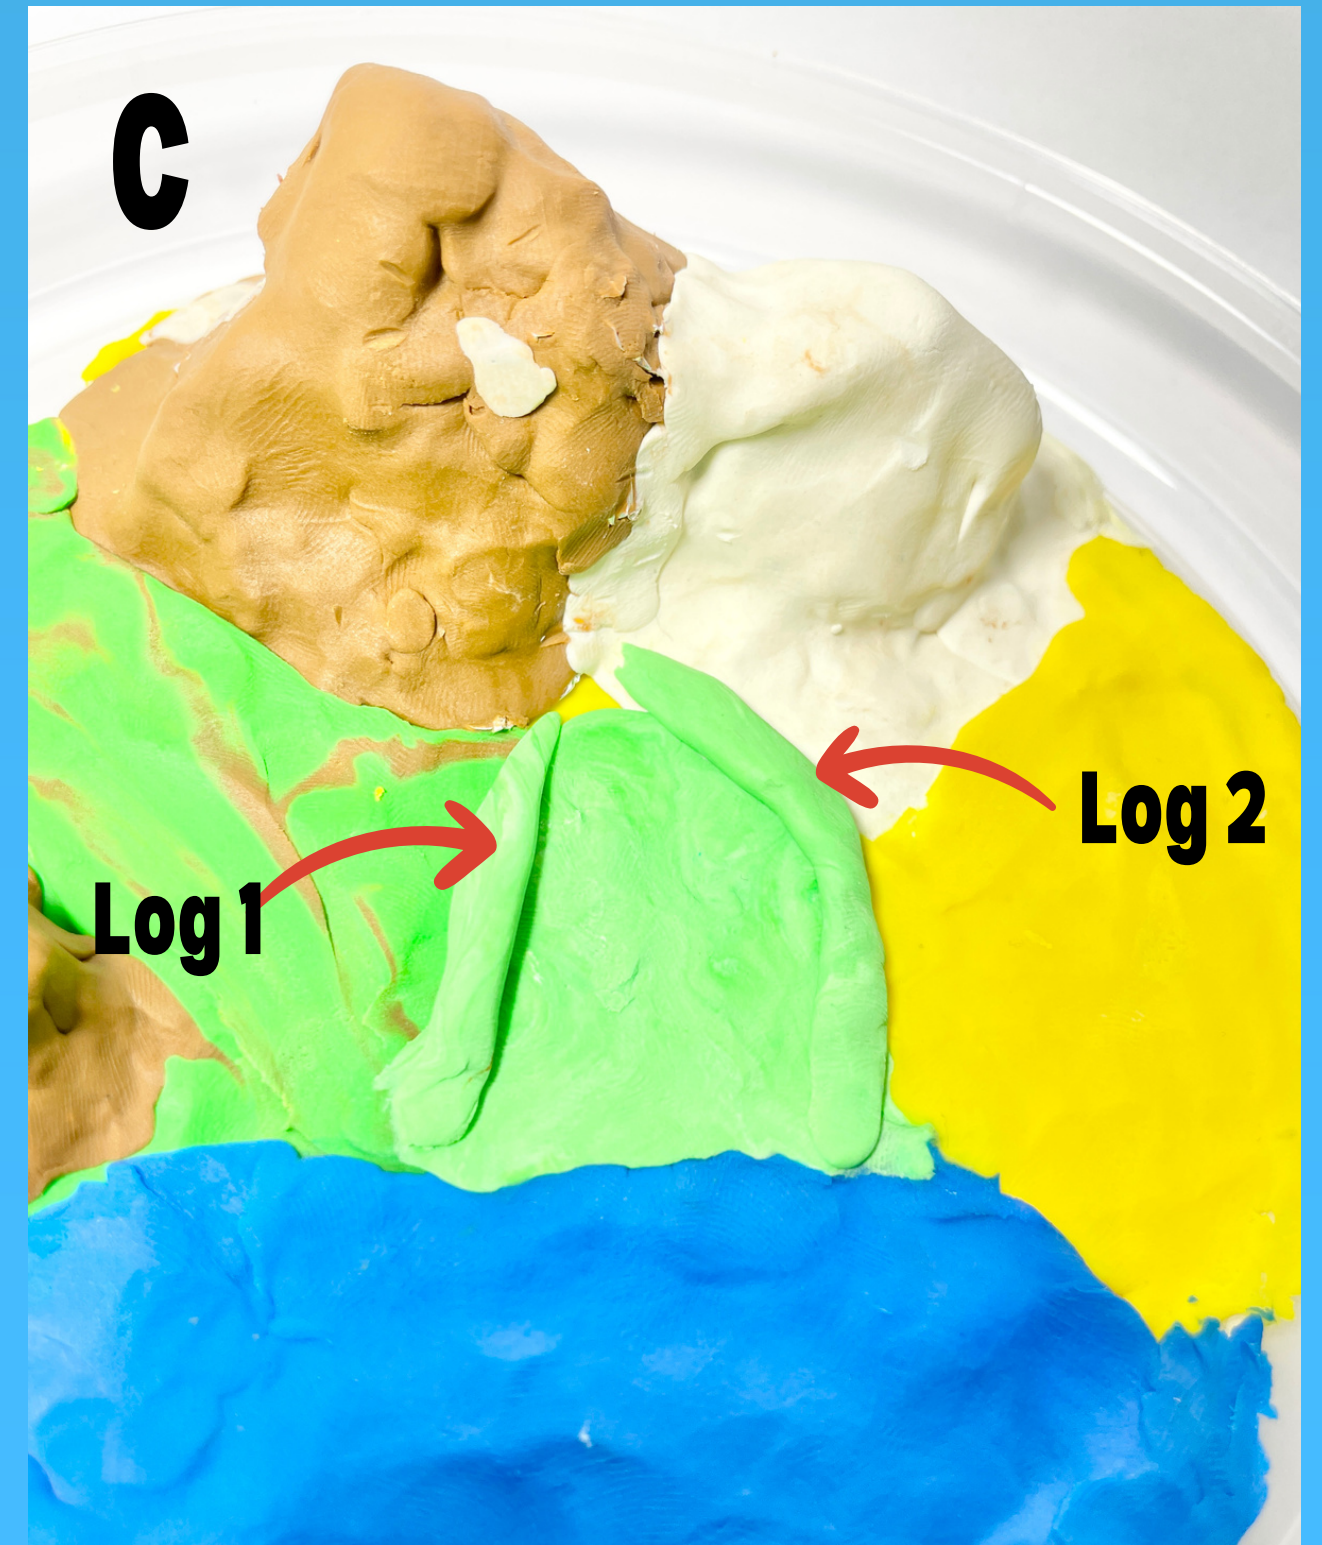

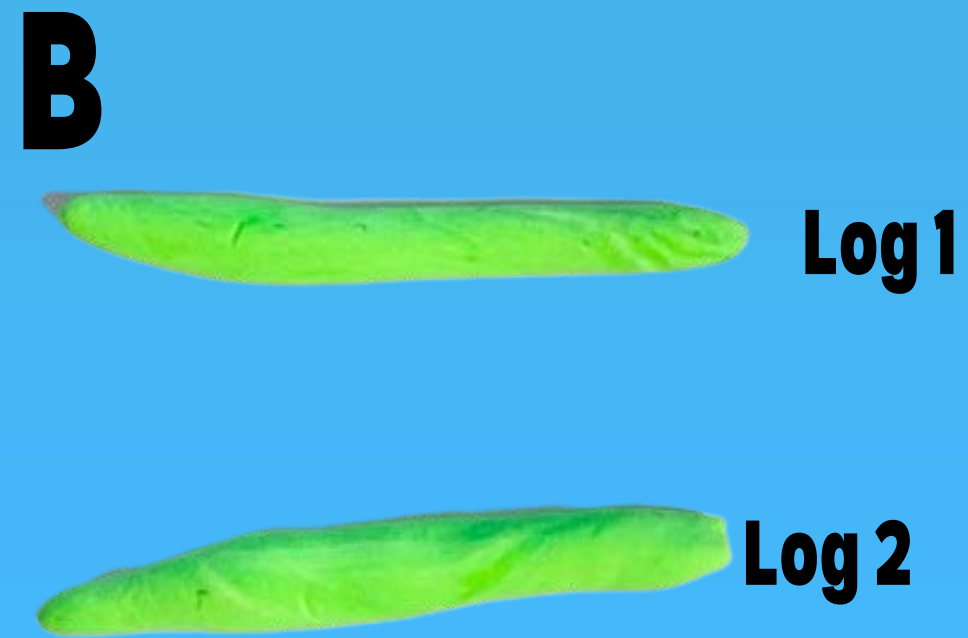

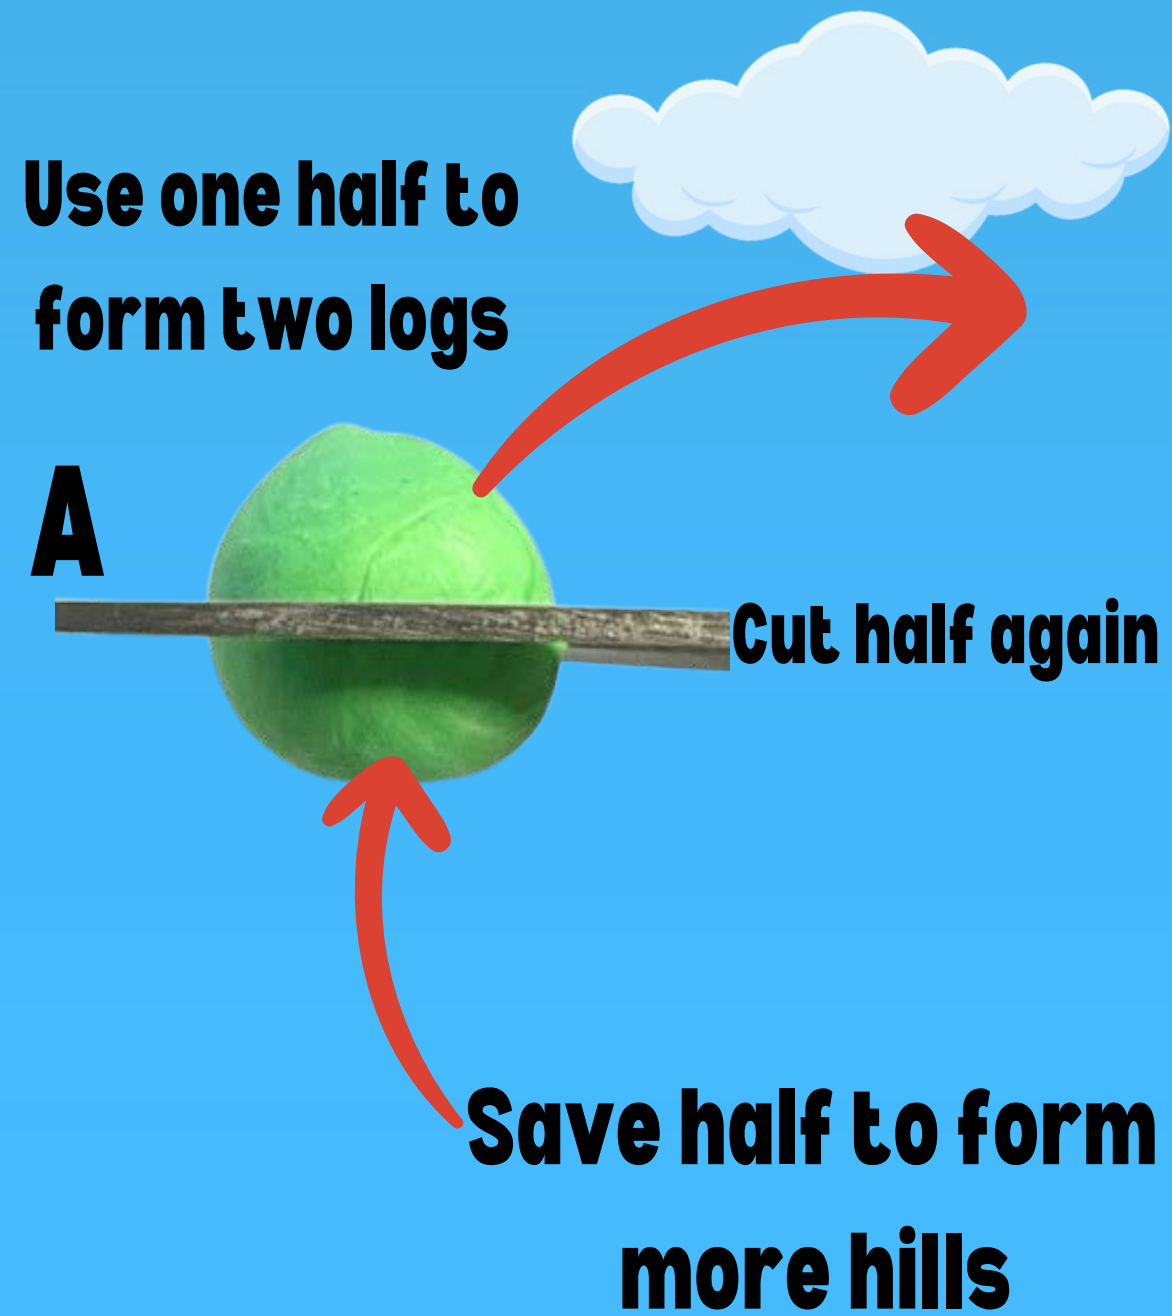

**Step 11: Cut blue clay 3 lines down. Set smaller piece aside.
Create a large pancake for the ocean.**

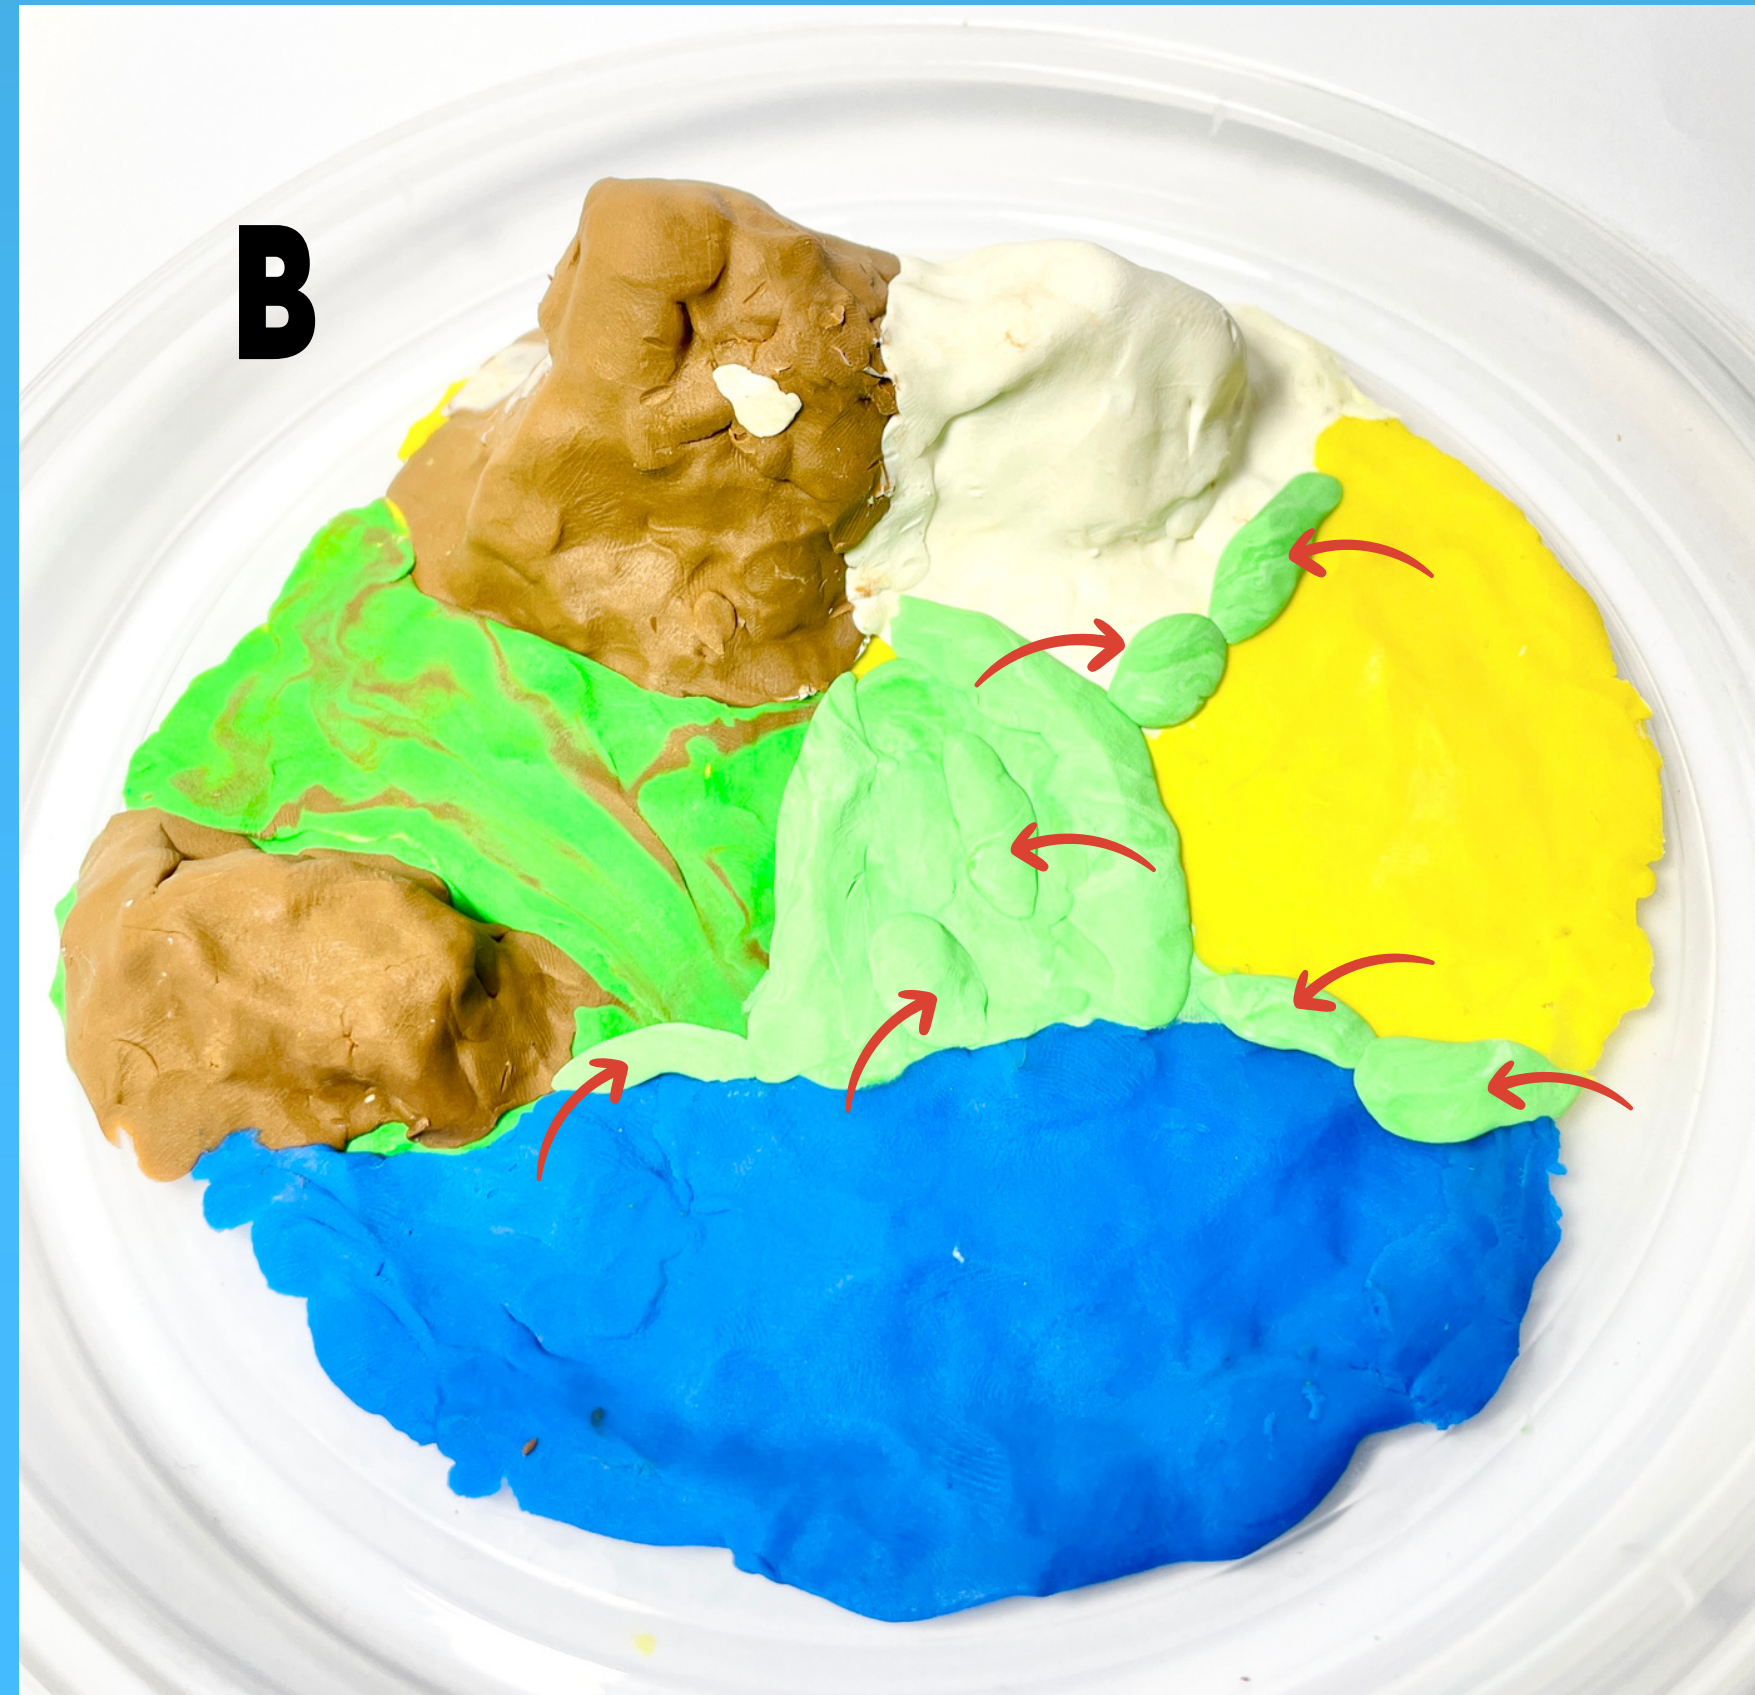

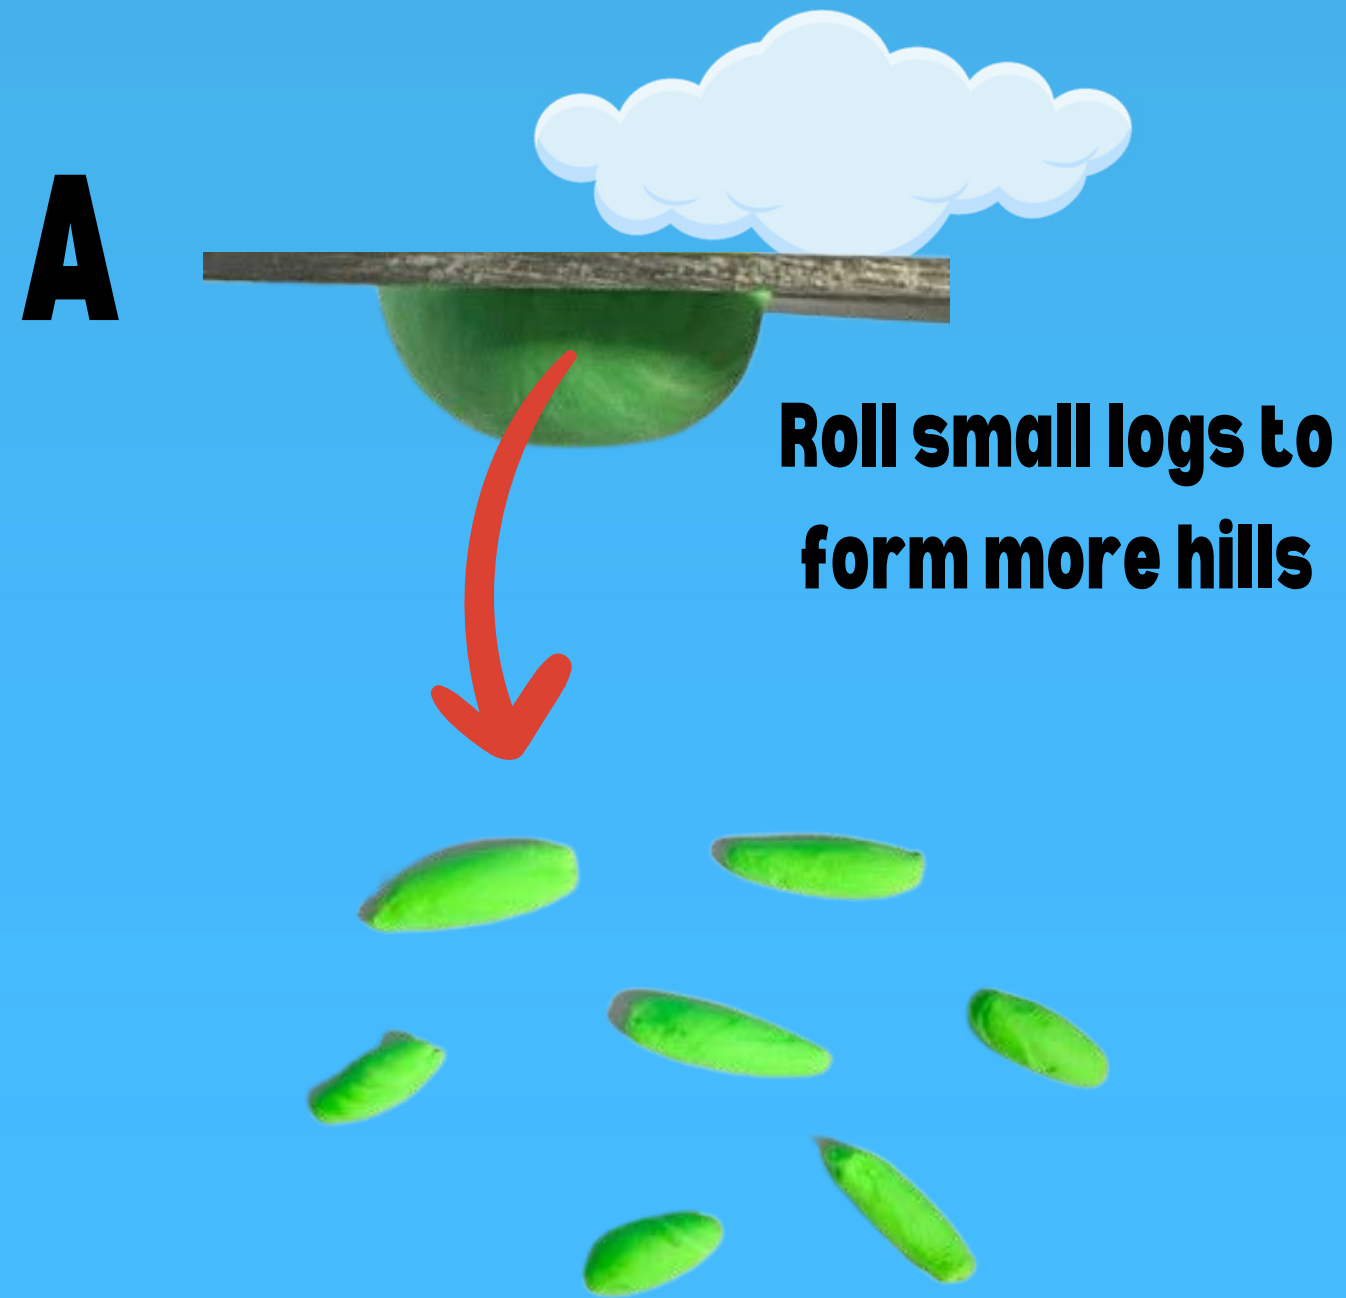

Step 12: Cut white clay 1 line down. Set smaller piece aside. Fully mix white and green clay. Cut light green clay ball in half. Make a pancake for the valleys.

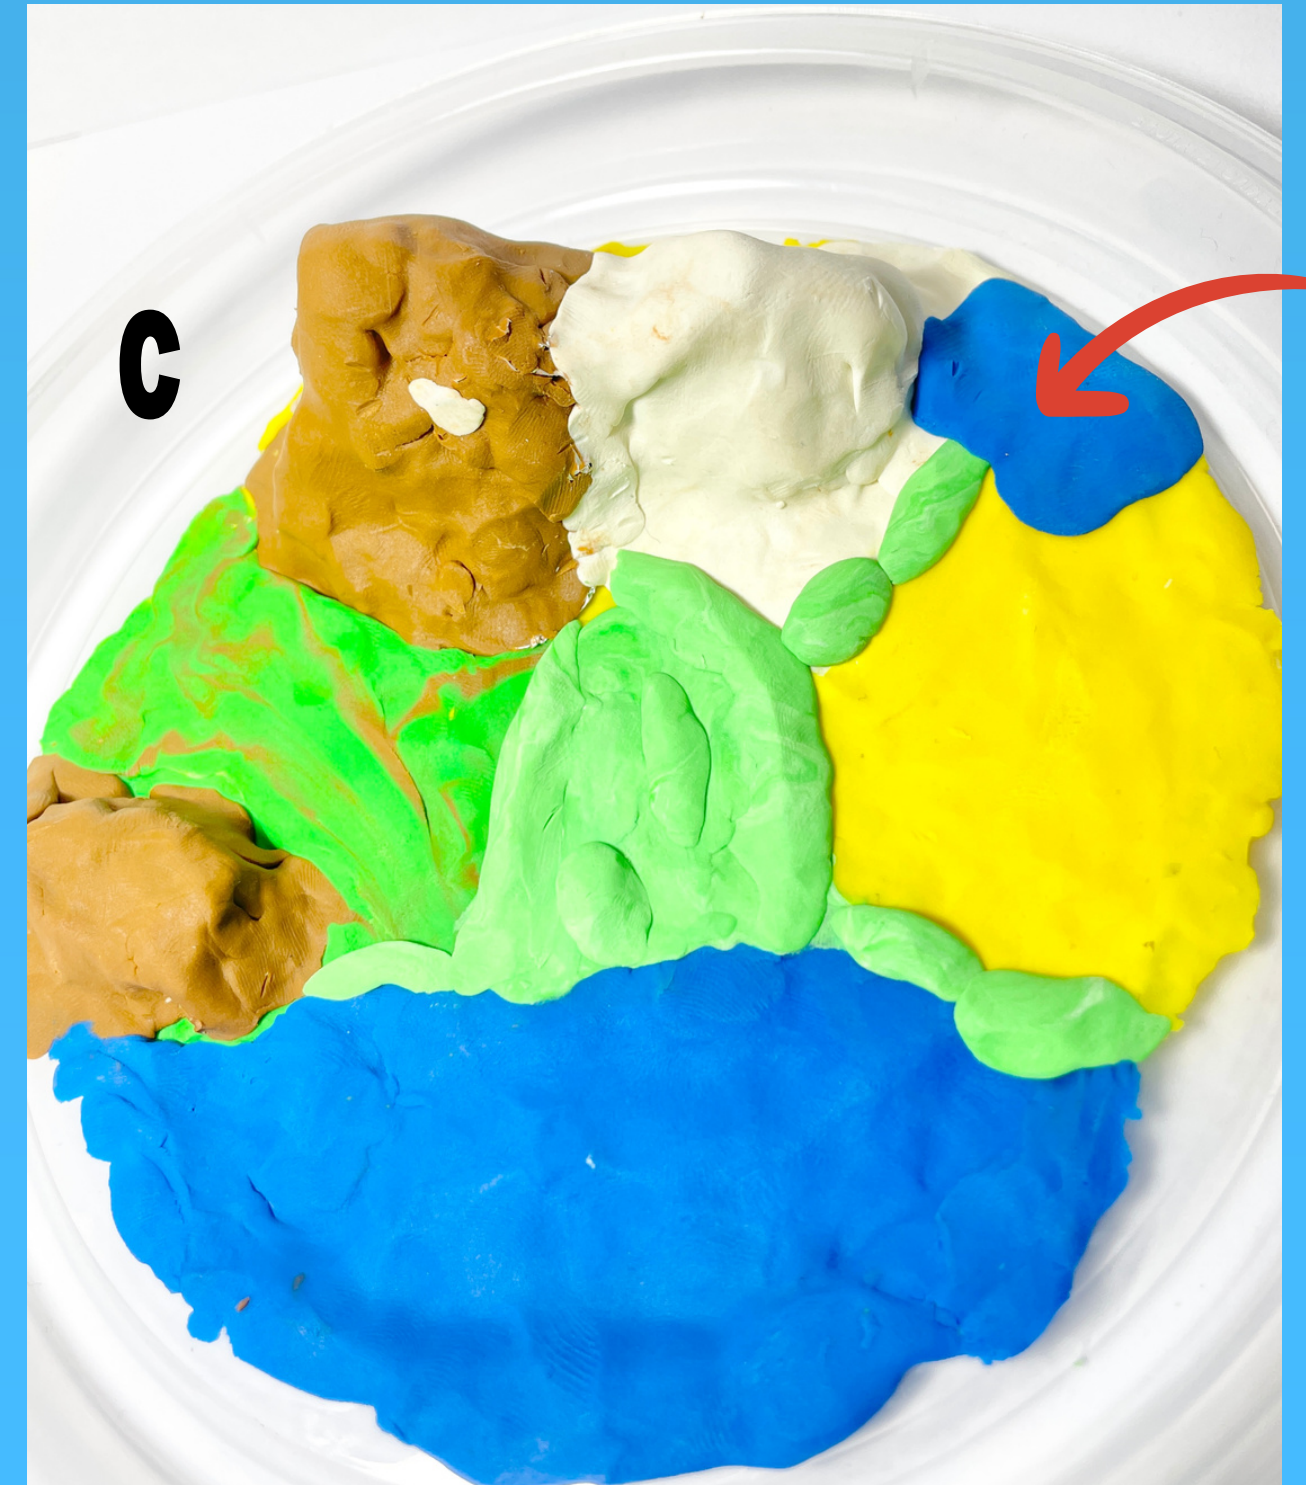

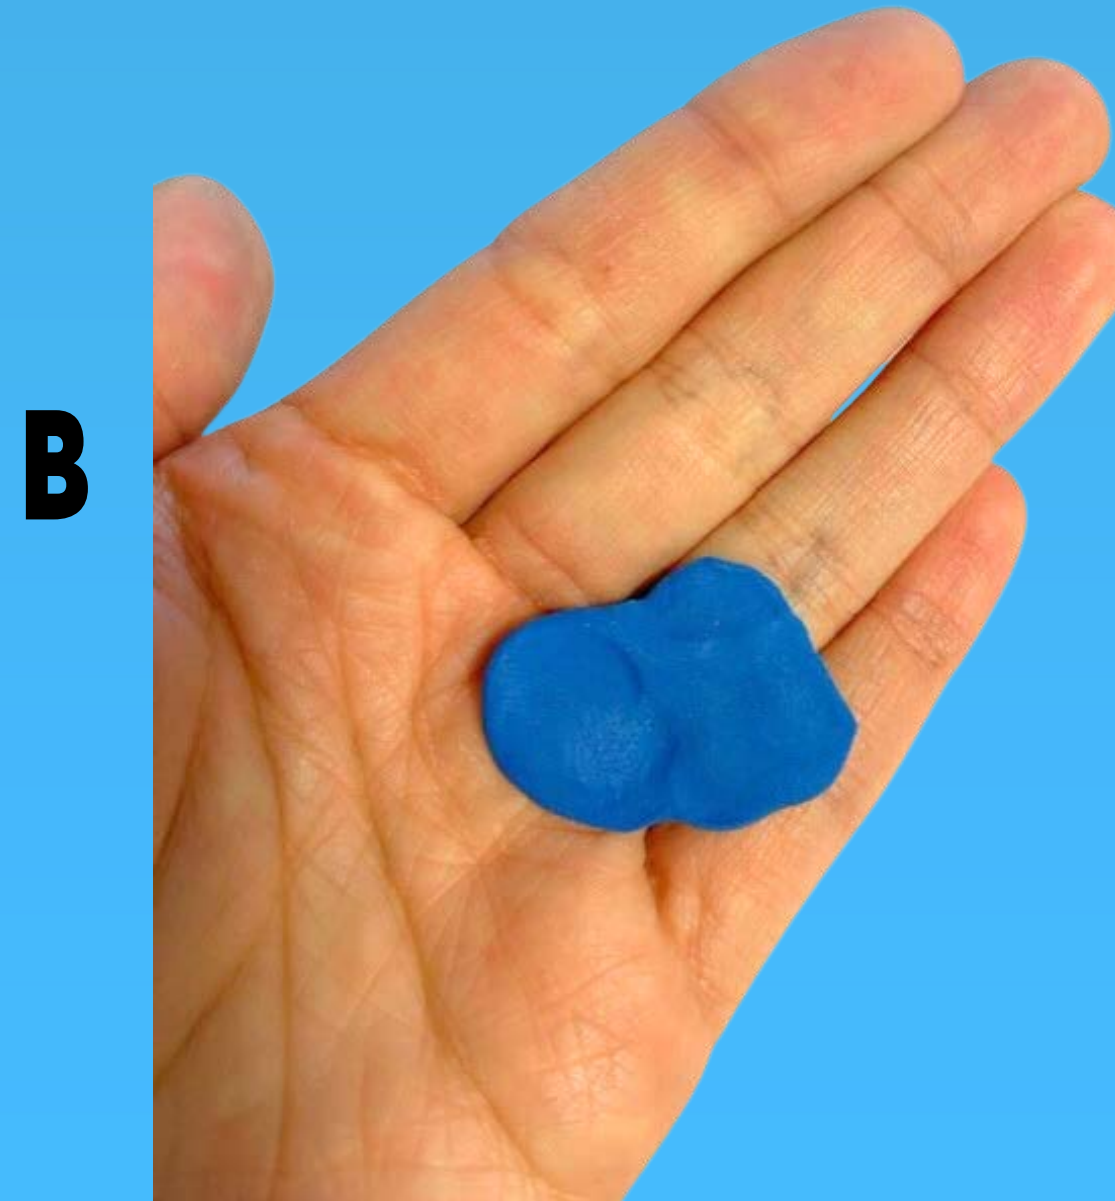

**Step 13: Cut remaining light green clay in half again. Set one piece aside.
Roll two logs to form hills in your valleys.**

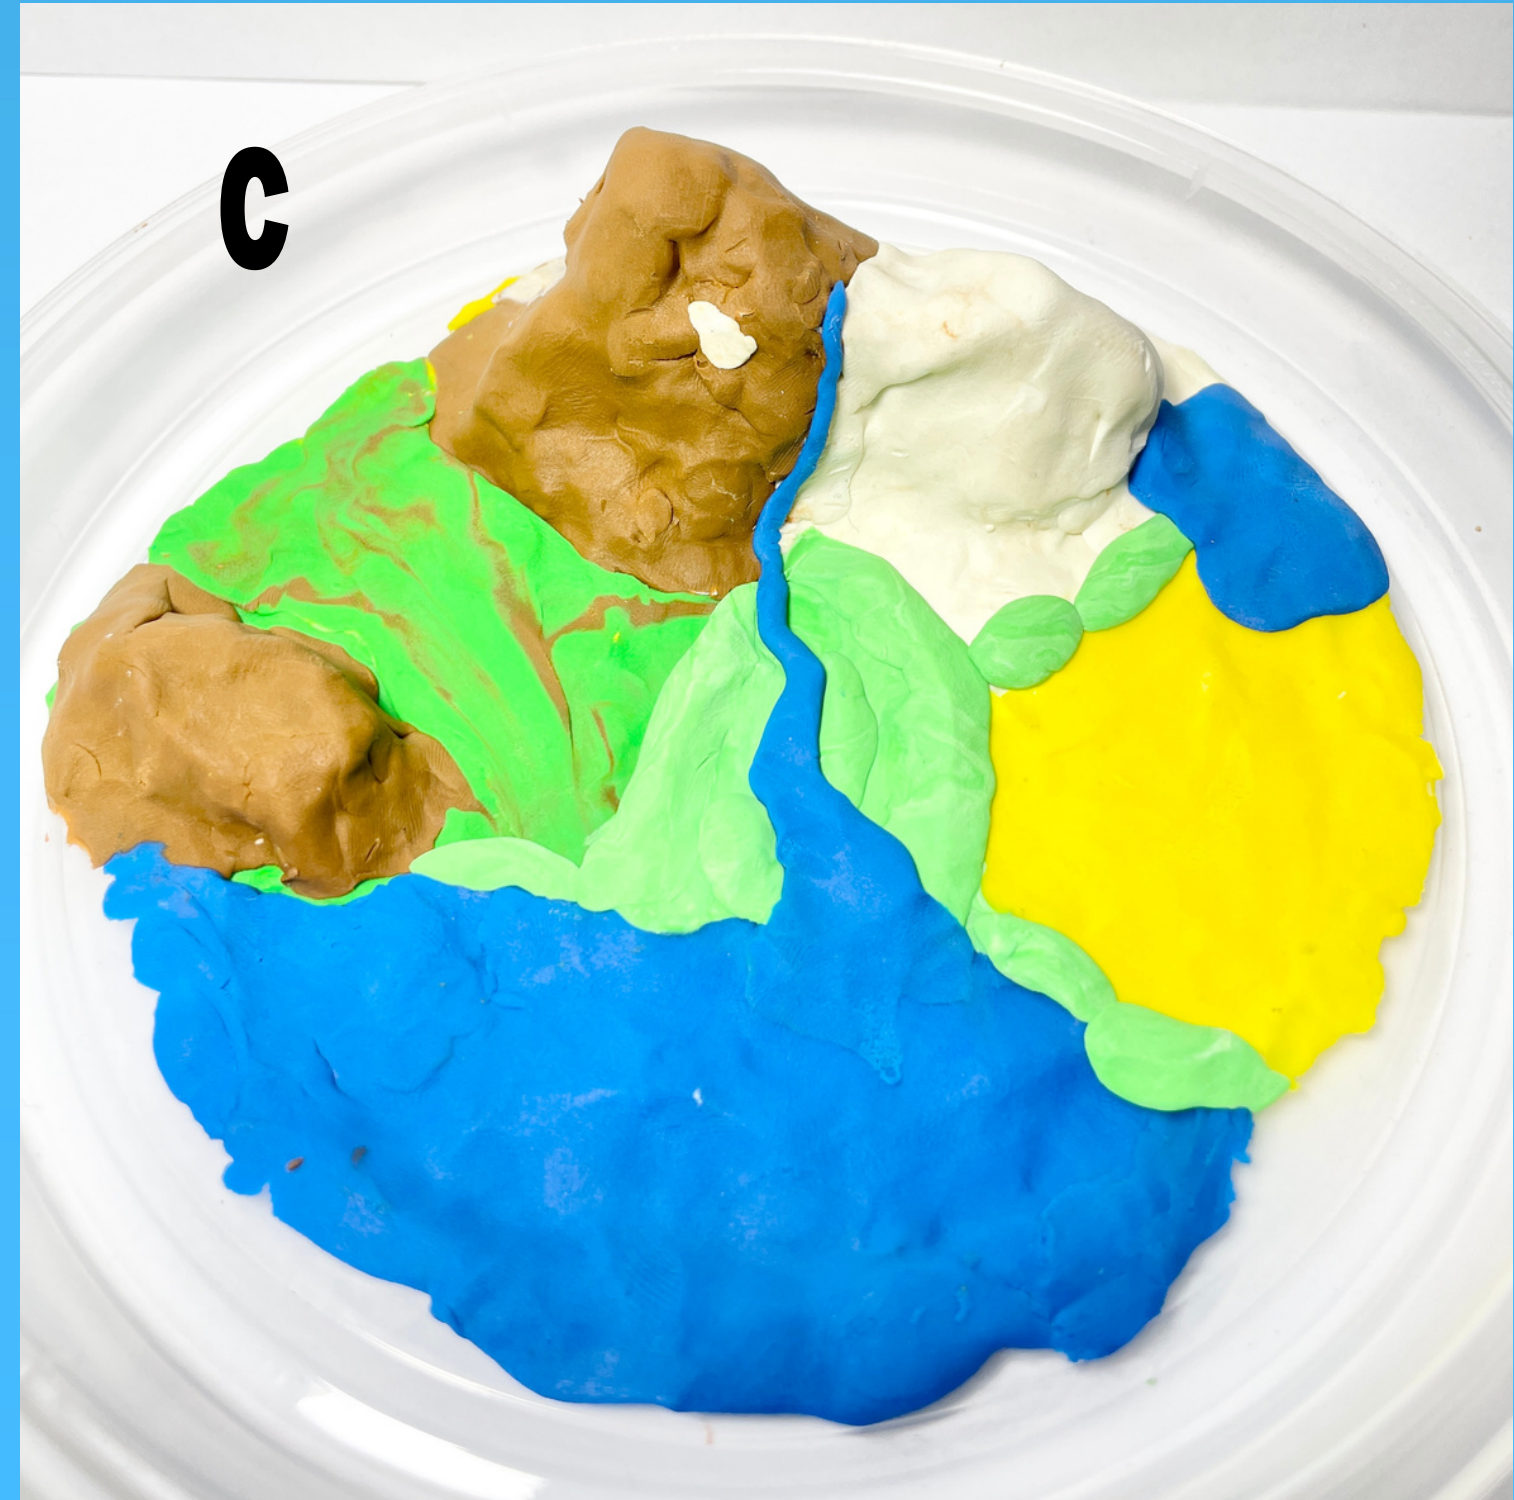

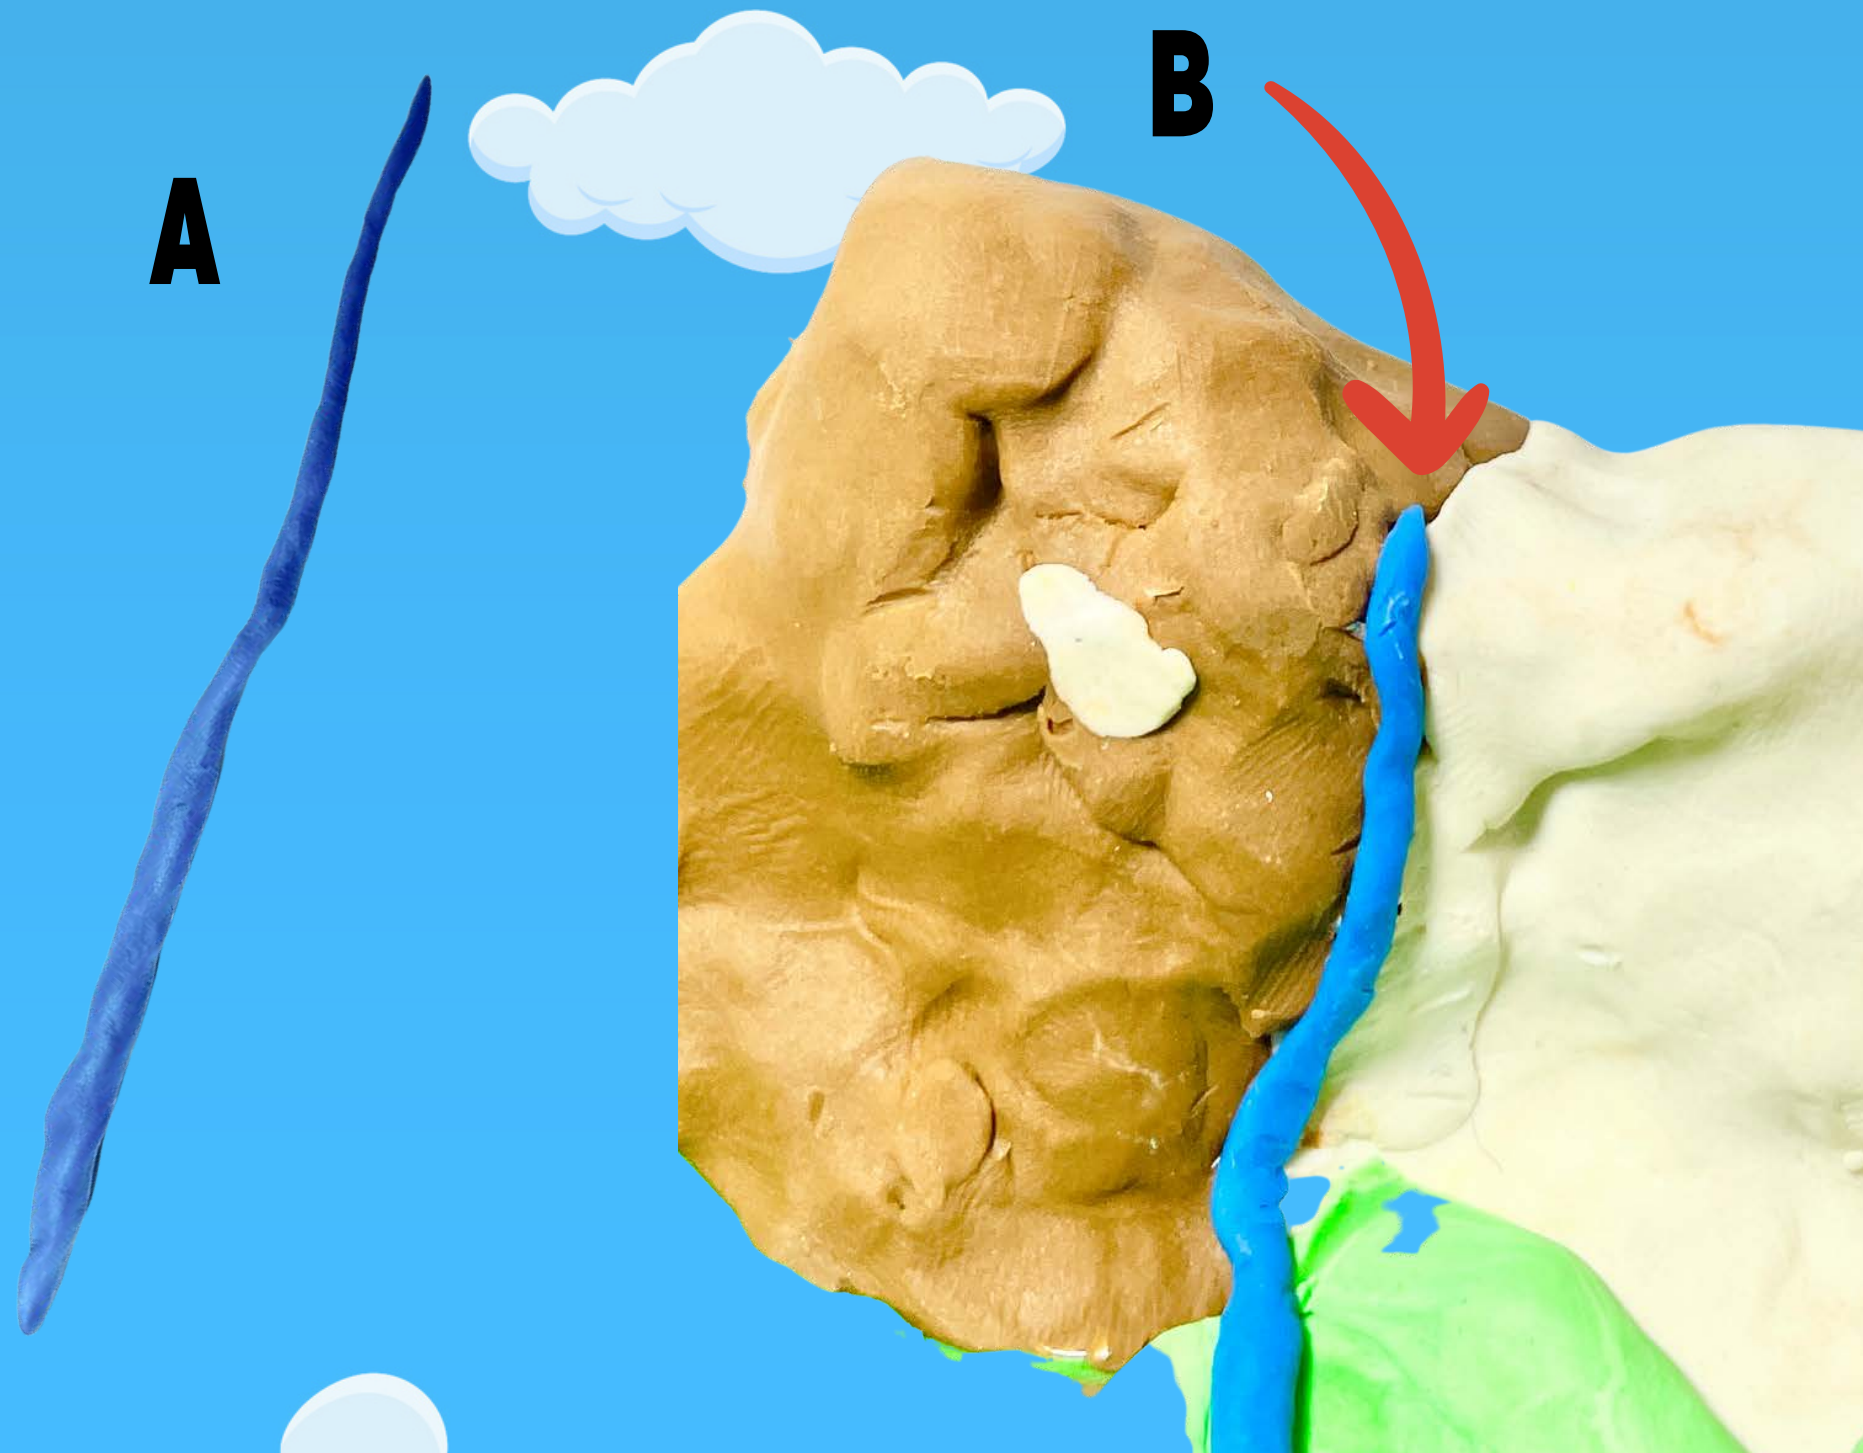

Step 13 cont'd: Use remaining light green clay to make more hills.
Add the hills around your landform model.

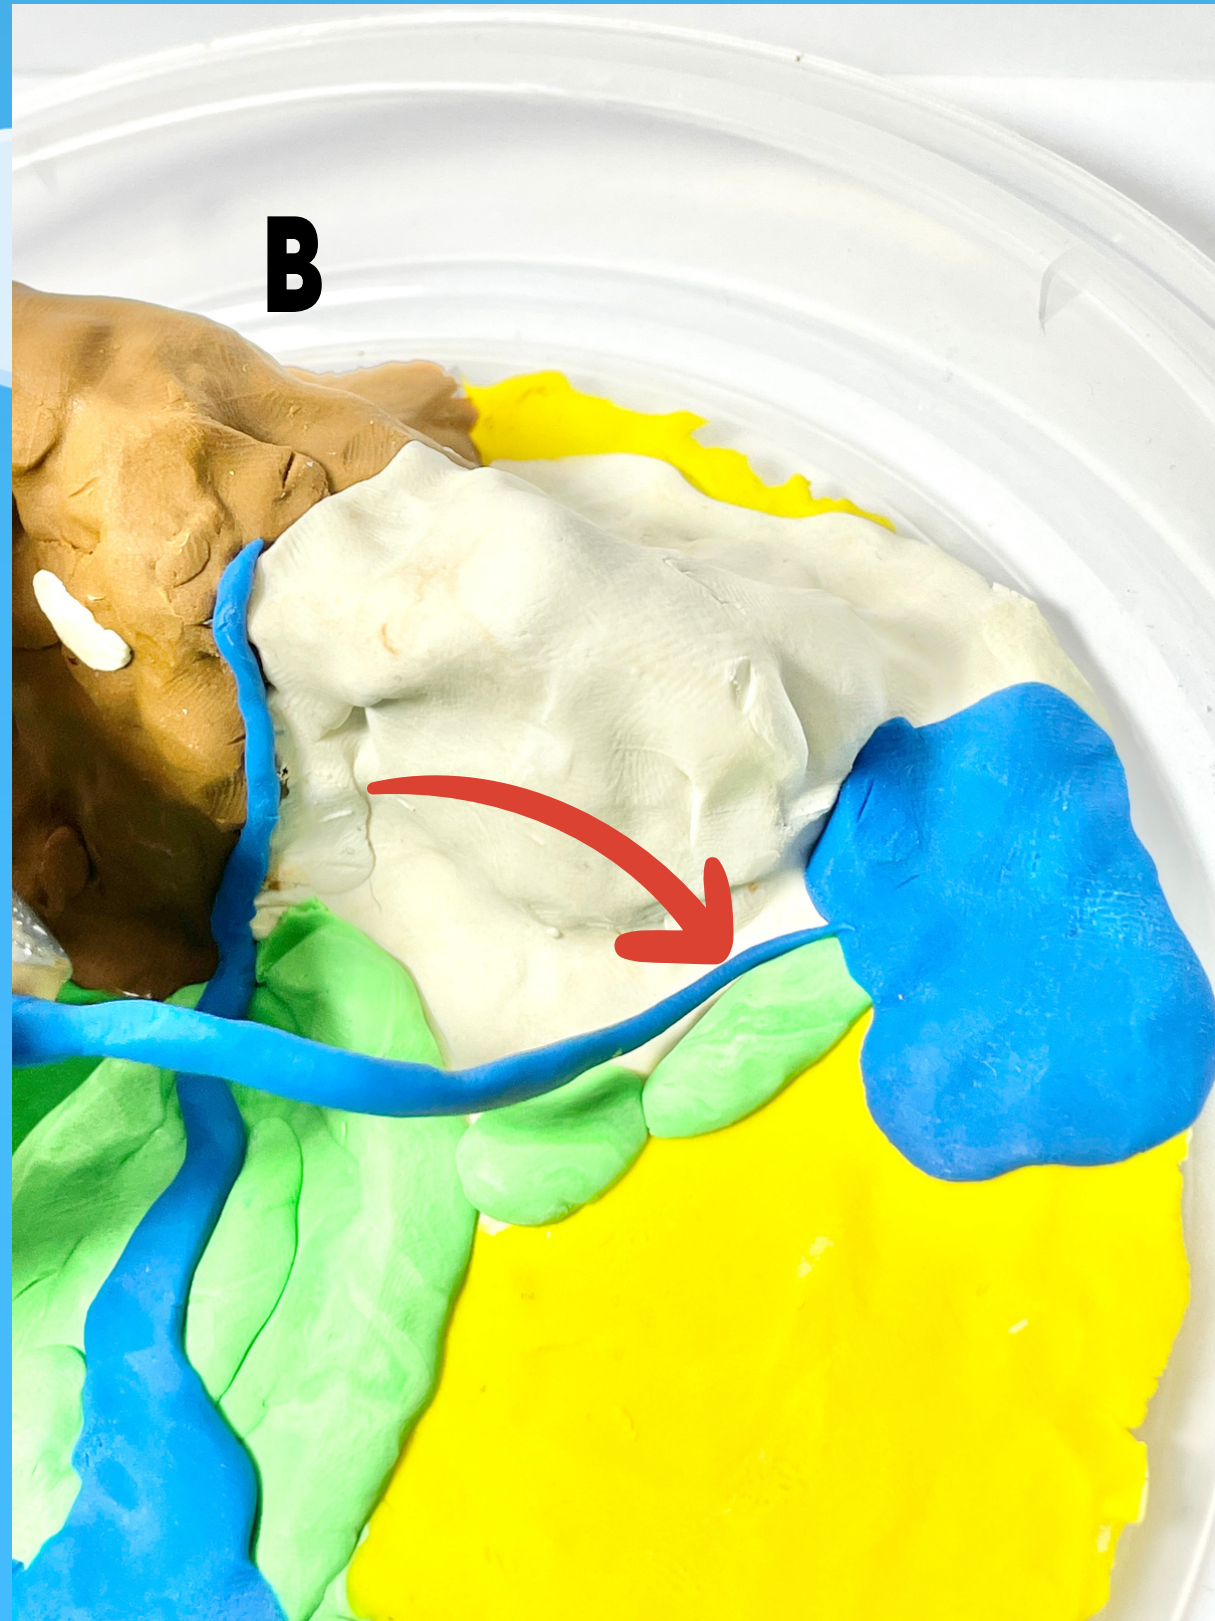

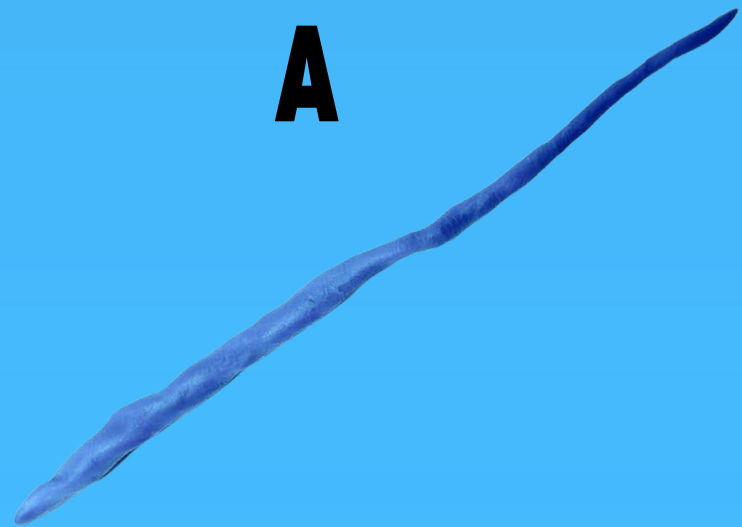

**Step 14: Cut blue clay 1 line down. Set larger piece aside.
Make a small pancake for the lake.**

Step 15: Roll a long blue snake. Place narrow end where the mountain and glacier meet. Create a river flowing down through the valley and connecting to the ocean. Remove excess clay at the end.

Step 16: Roll blue clay into a thin snake to create a small river to connect the lake to the larger river.

Step 17: Roll tiny snakes to create thin creeks and streams on the mountain connecting to the river. If you have excess blue, create more lakes/rivers as you wish.

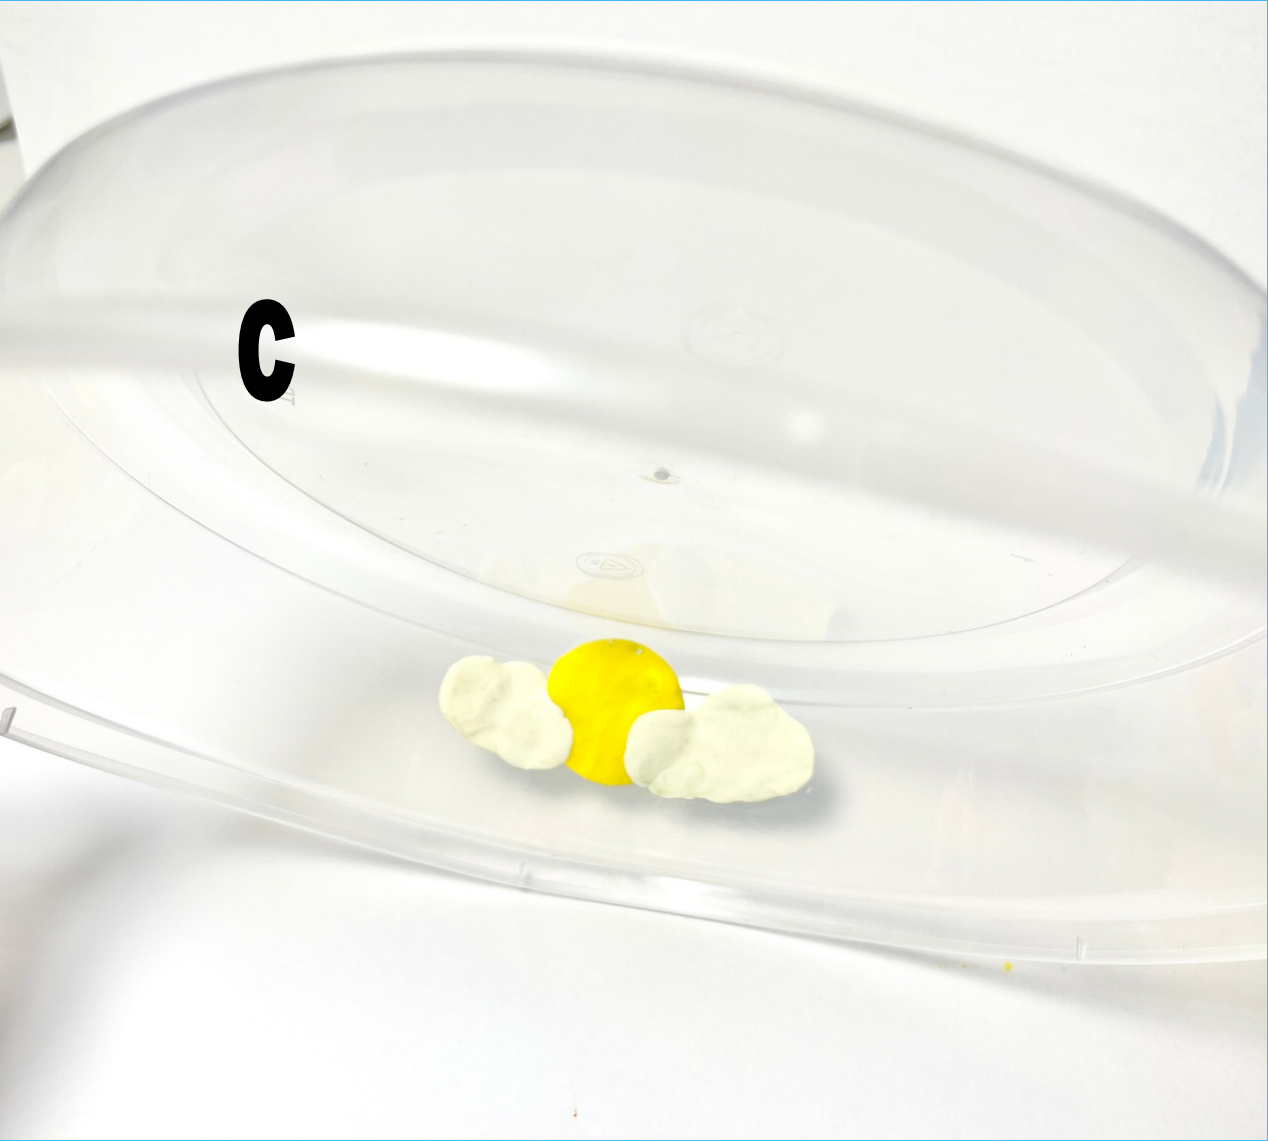

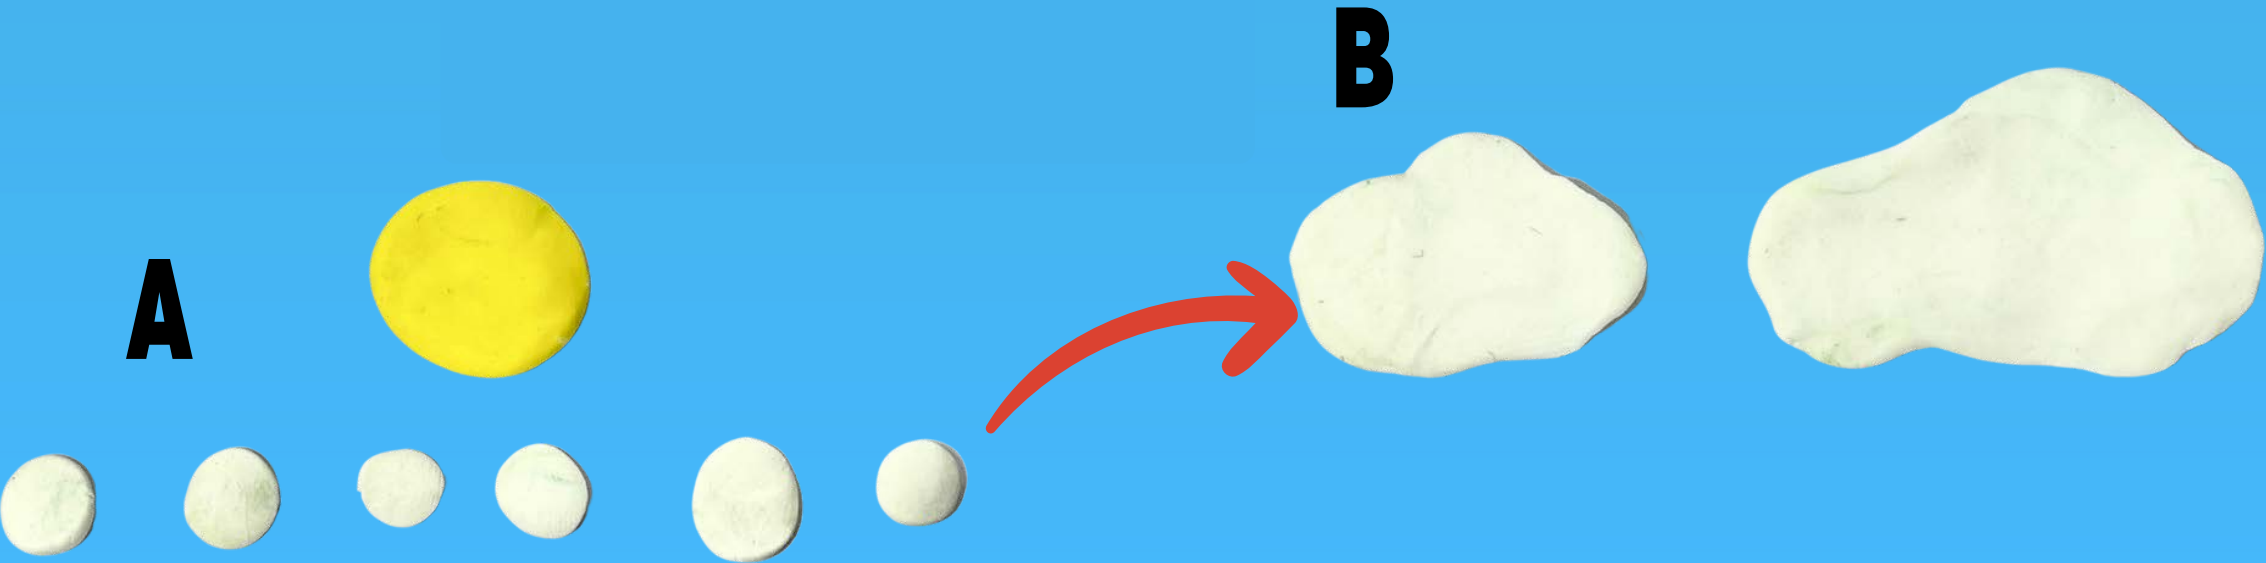

CHECK STOP Time Check

Step 18: Create a sun and clouds. Stick them inside the dome.

Step 19: Create details and texture to complete your landform model.
