

**Get Up
and
GROW!**

Teacher's Pet

What plants and animals
live in your backyard?

Respect for Plant and Animals

Protect wetlands!

Plant a garden to grow your own food.

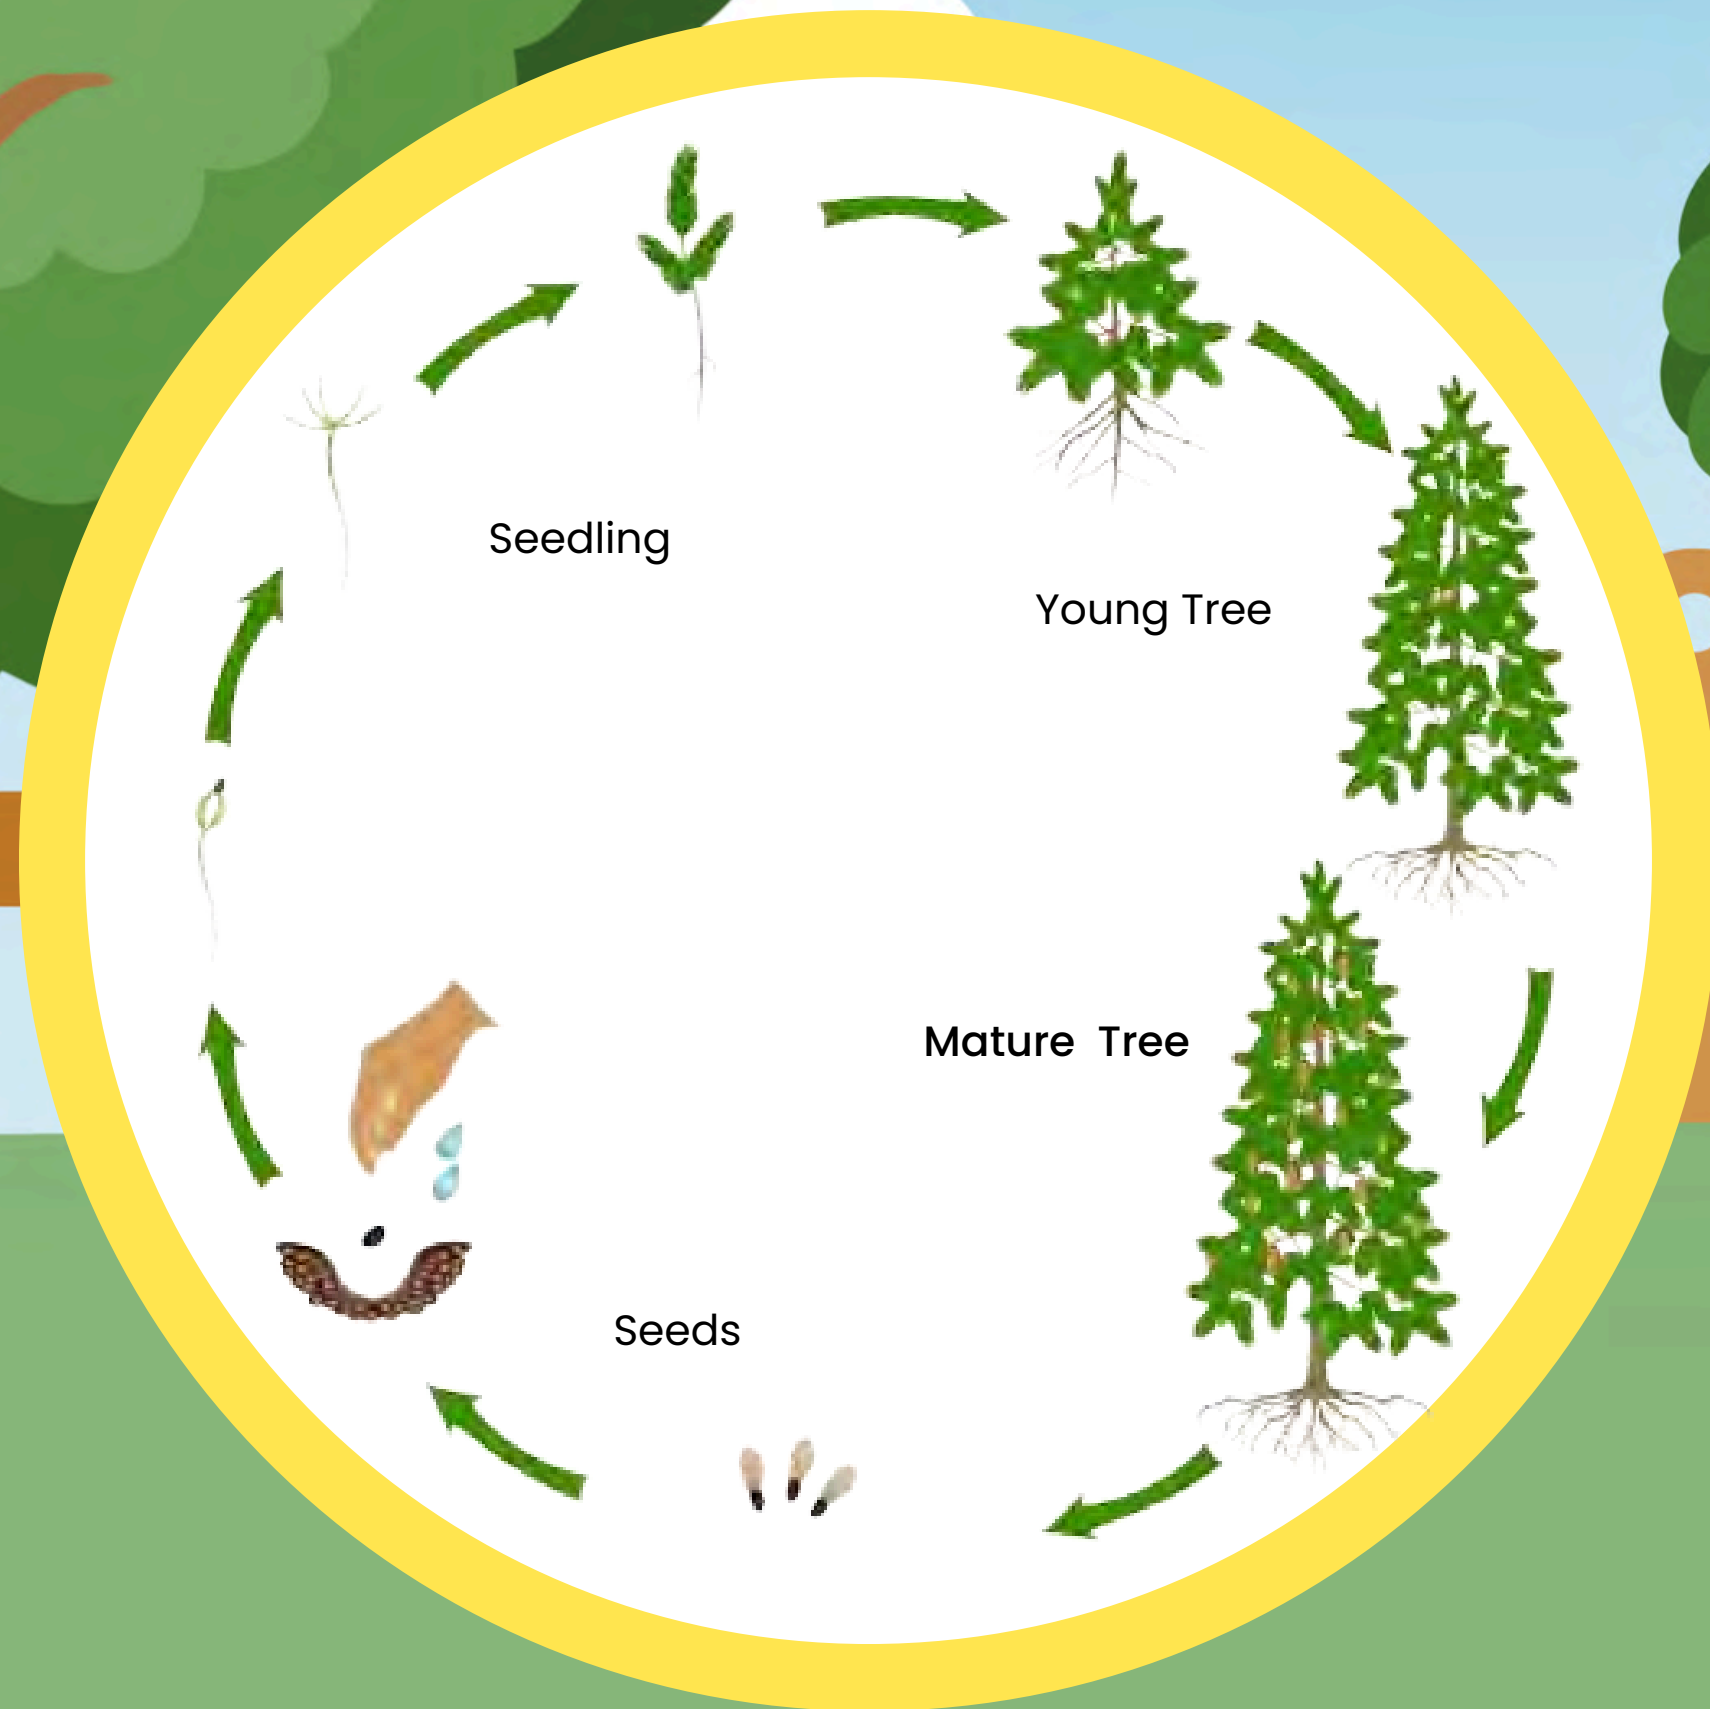

Stay back, only take photos!

Stay on marked trails.

Plant Life Cycles

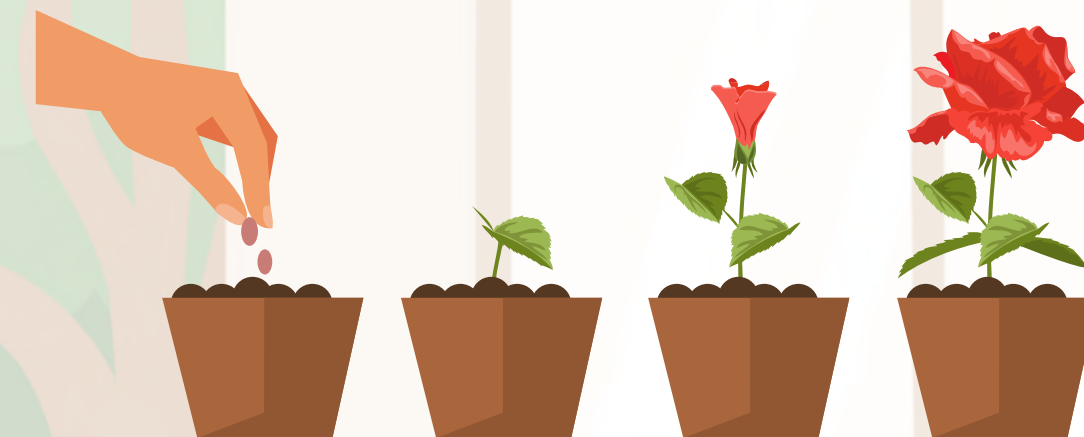

What does offspring mean?

- An offspring are the children of plants and animals
- Plants and animals have similarities with their offspring

Life Cycle of a
Spruce Tree
Video

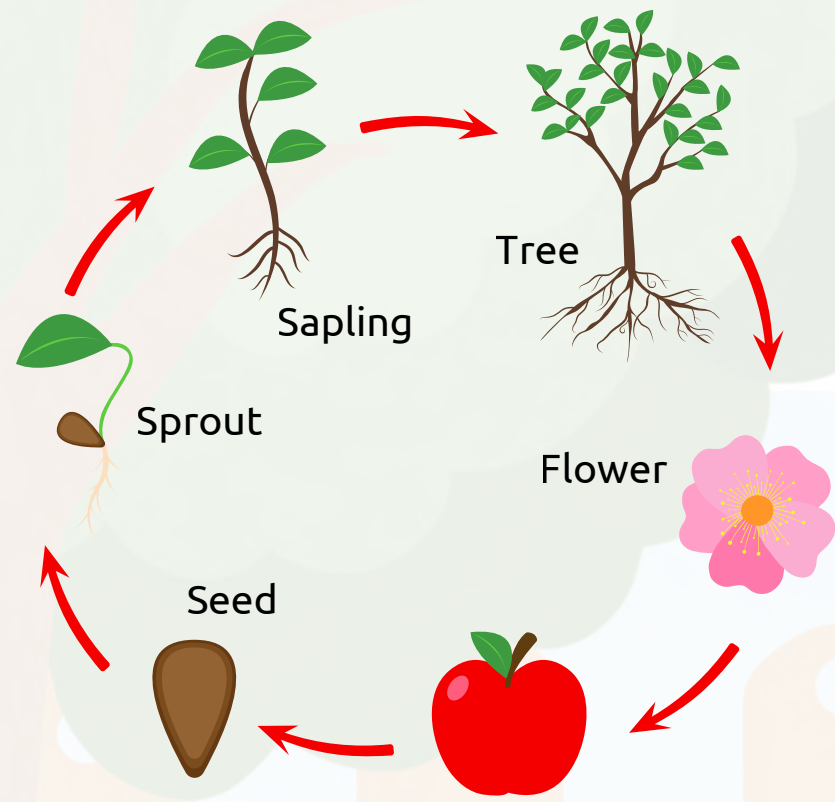

All living organisms need water to survive.

Remember those cones we looked at? Yummy!

Do worms play a role in this life cycle?

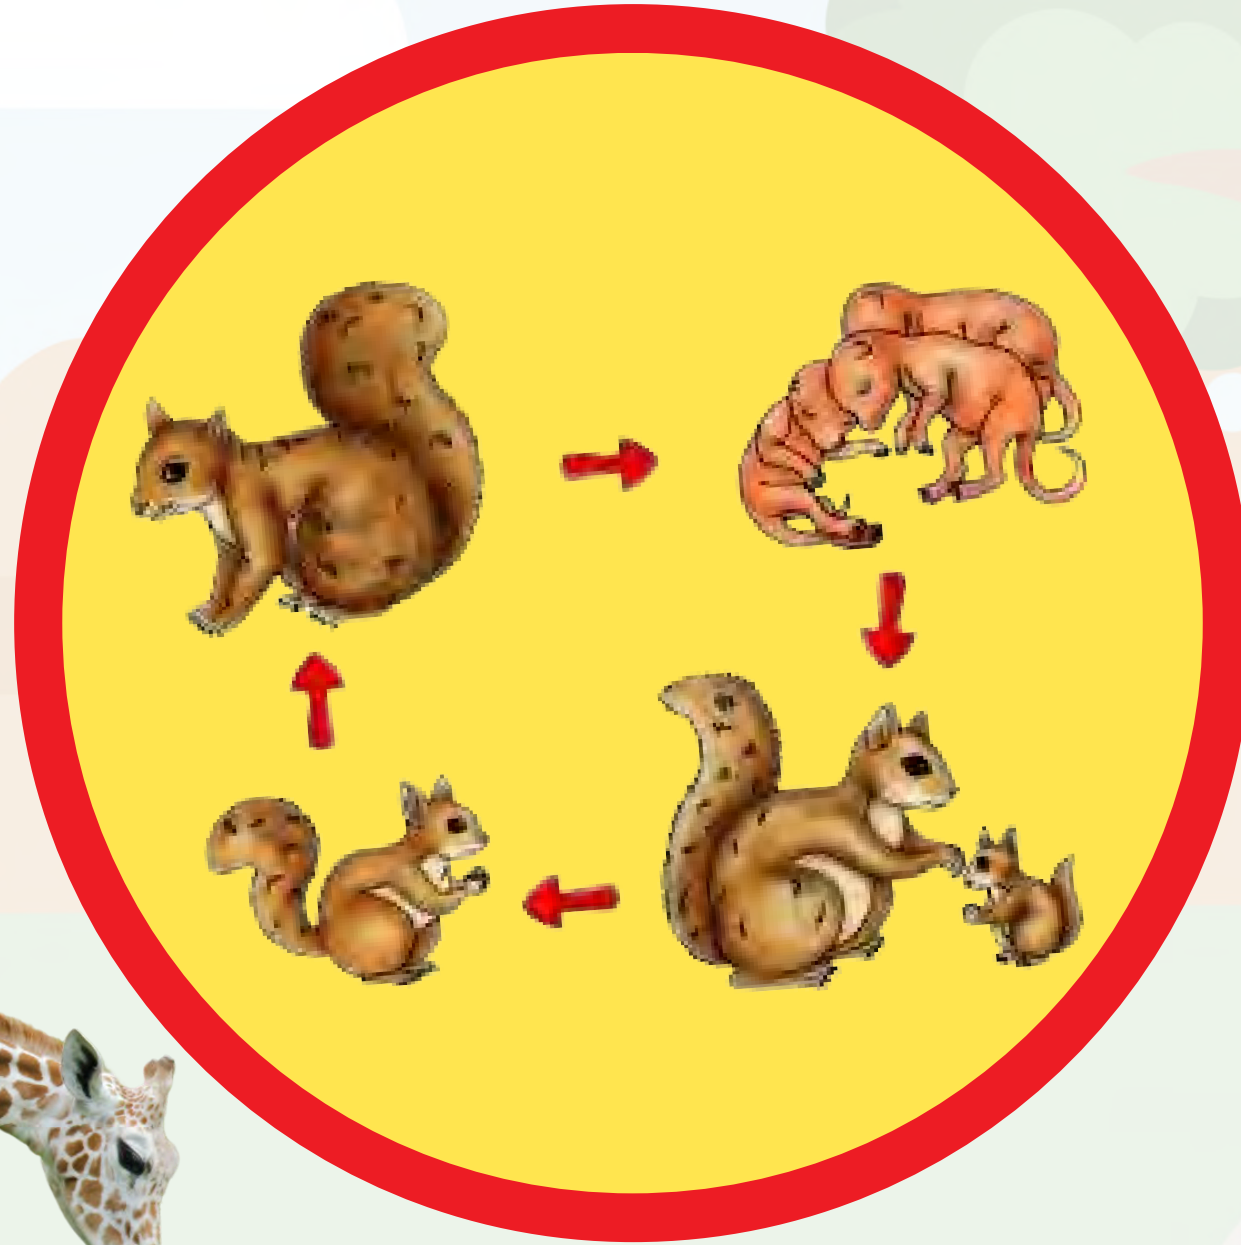

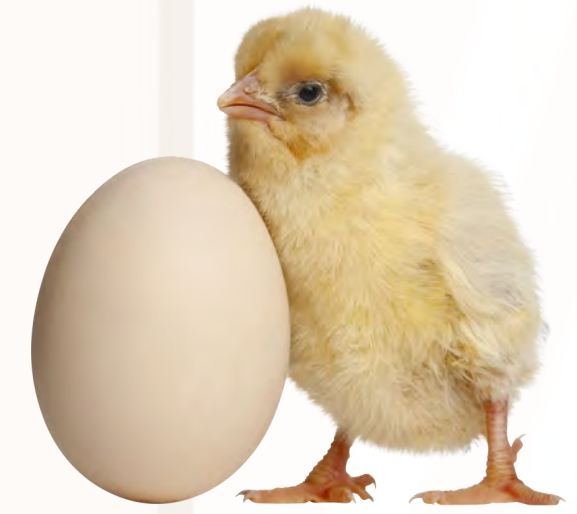

Body Break

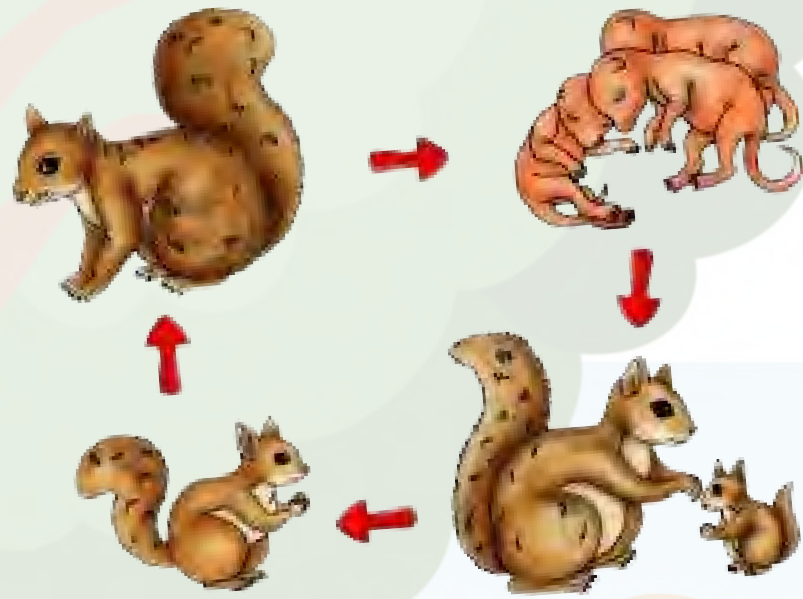

DANCE TO EARN 5 STARS

UP NEXT

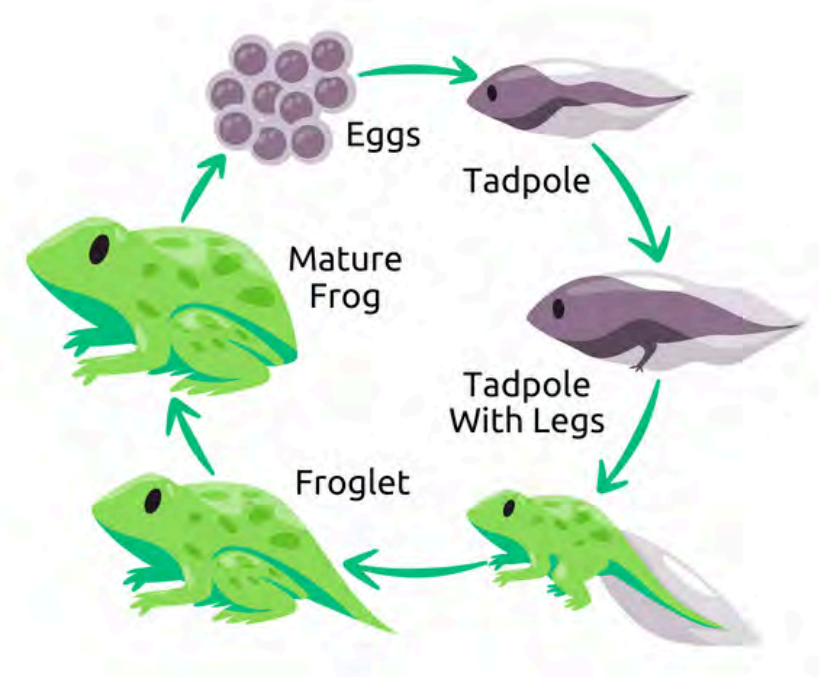

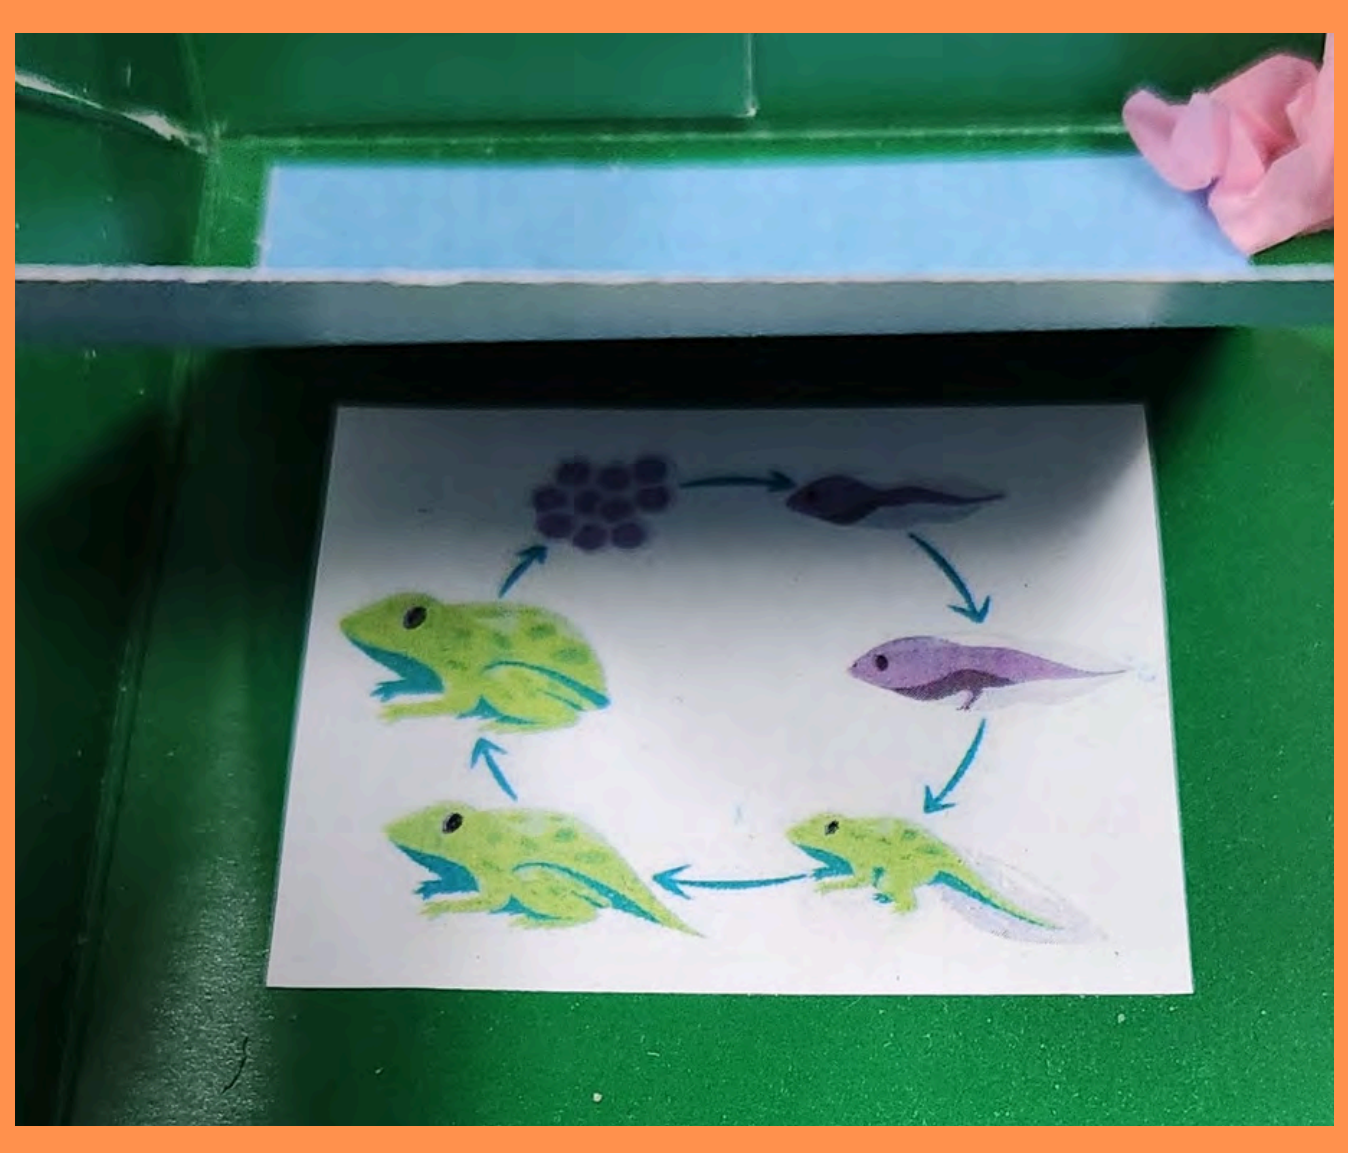

Once you have your house built, hide the squirrel life cycle with it!

Did you know baby frogs have tails? Just like me!

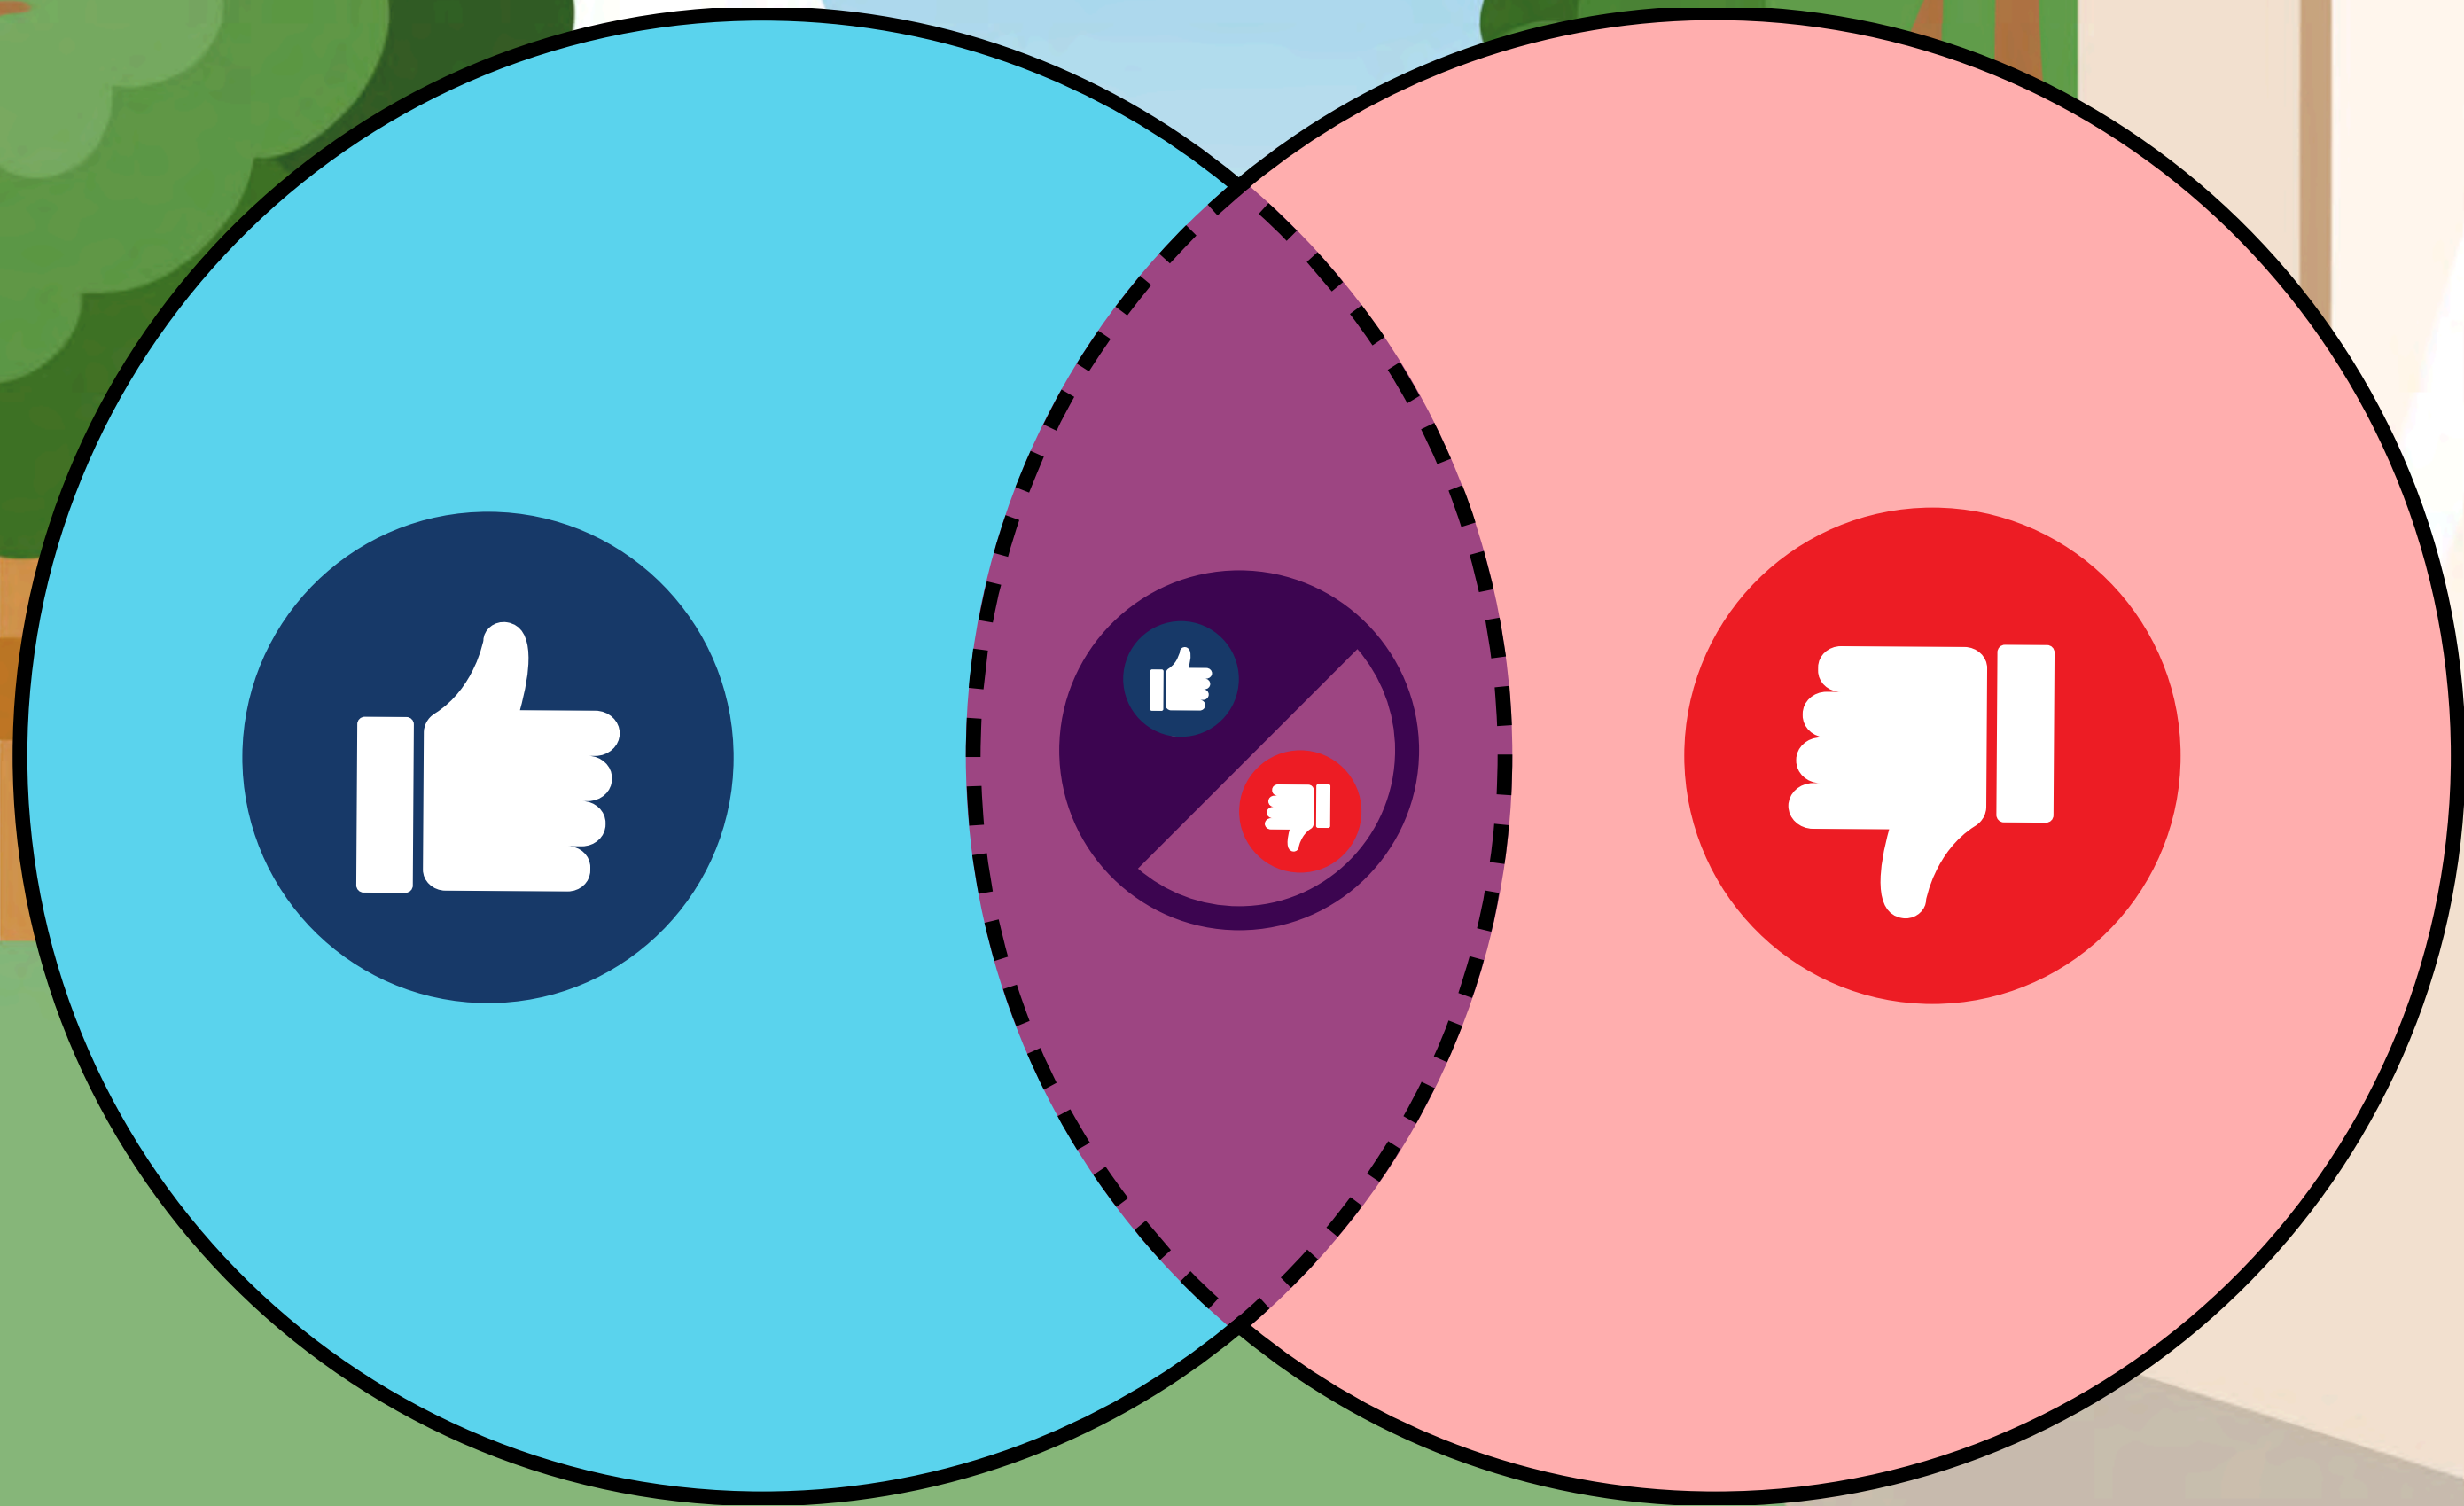

Stewardship

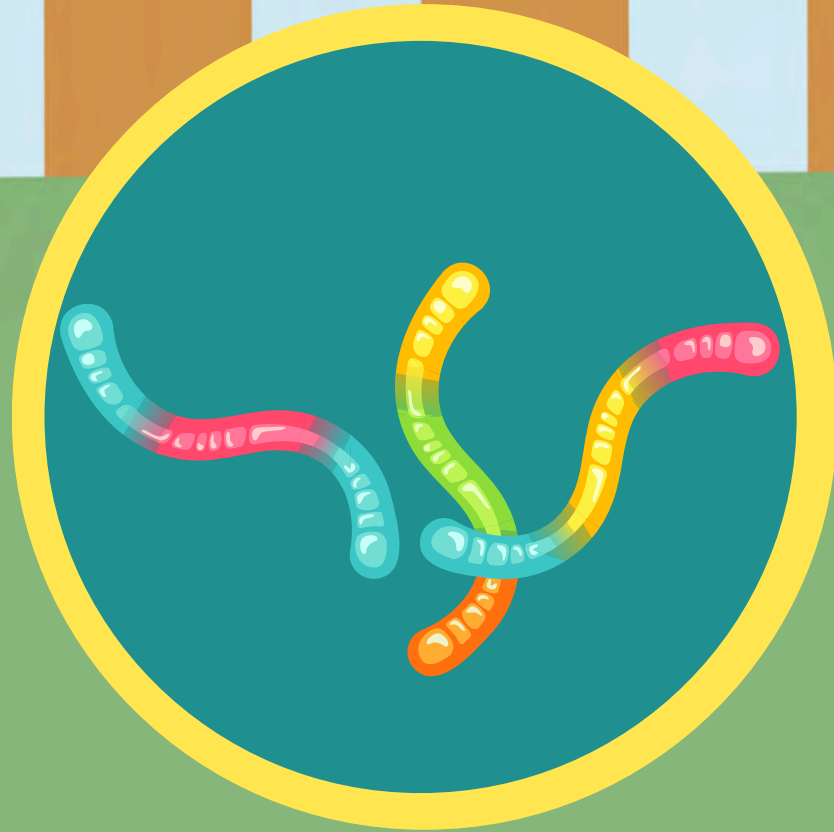

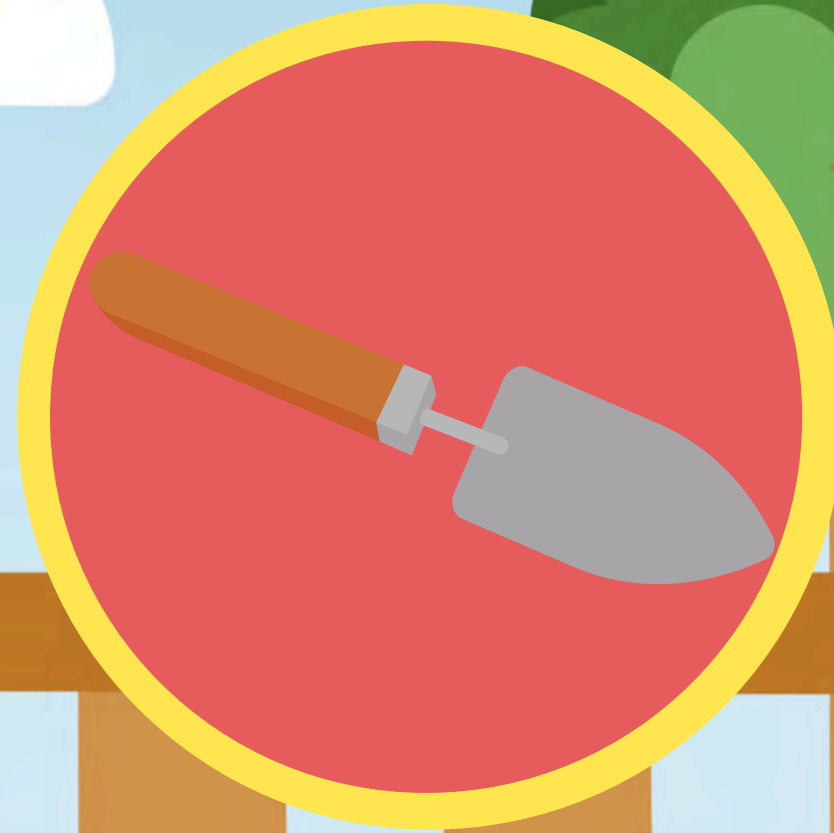

- When we learn how to take care of the earth
- Make a positive impact on plants and animals on earth
